CHIROPRACTIC

If you are sick and wish to get well have the nervous system put to rights and nature will do the rest.

Try Chiropractic, the natural method of relieving sickness and pain.

DR. G. C. ALBRIG'T, CHIROPRACTO

In Napanee Tuesday and Saturday of each week, at the home of Miss Anderson, Thomas Street, near Centre Street.

TAMWORTH

The funeral of Miss Blanche Yorke, the unfortunate young lady who was done to death at the residence of Dr. Robinson, took place Friday, July 31st. The Methodist church was packed. There not being enough seating room. Rev. Mr. Barnes preached a good sermon for such an affecting occasion. The body was interred in the Methodist ceme-tery. After the funeral the other tery. After the funeral the other missing leg was found in an ash bucket, covered over with some old potatoes to hide it. In this ash pail was the burnt bone of the leg, and the rest of the large purse, and some corset steels, the missing parts not found before. This makes all the missing parts complete, showing that the doctor intended to burn the whole body in the furnace, only that the body in the furnace only that the neighbors made such a noise about the smell of smoke. He was afraid to go furthur with it. Now this is all that can be done until the doctor is

caught. It now appears that another tragety nearly happears that another ragety nearly happeared on the 29th of July. Just before the funeral, the grandfather of Miss Blanche Yorke, who is a very old man, 89 years old, went to the sleeping room with a lamp. He takes weak spells or faints. He had one of them, and fell, upsetting the lamp. One of the women went to the door and found him. door and found him. In a few moments more, in all probability, he would have been beyond help, and the house would have also been destroyed.

One trouble scarcely comes alone. One trouble scarcely comes alone.

The excitement is dying down just now, until the doctor is found and brought to justice. It was a revolting crime. In looking it all over it looked like the work of some mainae.

The farmers in this locality are uneasy at the long drought, all late W. C. Denis was a constant.

NAPANEE FIREMEN

WIN HOSE REEL RACE AND THE HANDSOME WADDELL TROPHY.

MANY CONGRATULATIONS

The Napanee Firemen, at the Firemen's Tournament at Lindsay, on July 30th, covered themselves with glory by carrying off the handsome Waddell trophy in the hose reel con-test. This trophy is much coveted by the different volunteer brigades in Eastern Onario, and no wonder, for it is one of the most beautiful ever offered as a prize in any athletic contest. For some time previous to the event the firemen practiced and trained two and three nights a week on the track at the driving park, and it seems like a just reward that success should crown their efforts. In unshould crown their efforts. coupling the hose and putting on the nozzle the local boys used an entirely different method, and at the contest in Lindsay, it made the members the other competing teams "sit up and take notice."

THE CONTEST.

The story of the contest is told in a very few words. There were six teams entered, and the order of their running was as follows:

1—Belleville.

2-Deseronto.

3-Port Hope.

5-Napanee. 6-Gananoque.

The Belleville boys in their trial made a good run, but got into trouble in uncoupling the hose, and did not

Deseronto was the next team to try but they missed the hydrant on their down, and they also did not wav

Port Hope was next, and they made the complete circuit in 35 2-5 seconds Trenton then came along and did in 34 2-5 seconds.

Napanee followed and did it in 34 seconds, but was penalized 2-5 of a second for not having the nozzle on to the mark, thus making them tie with Trenton.

At this stage in the contest the excitement ran high among the Napanee the question being what will ananoque team do. The best team, he Gananoque team do. The best ney could do was 37 4-5 seconds. This left Napanee and Trenton a tie

for first place.

Trenton brigade made the first to break the tie, but failed to break the coupling and no time was given, thus Napanee won the cup.

Team Managers-Fred J. Vanalstine and C. W. Conway.

When the Napanee boys fully realized that they had won the cup they simply cut themselves loose, and it was impressively brought home to the minds of the ten thousand visitors in Lindsay that day that there was a place on the map called Napanee, and place on the map called Napanee, and that the boys from that town had won what they came for, namely the Waddell cup. With the hose cart, drawn by about fifty Napanee people and headed by the Citizens' Band, procession was formed, and the differstreets through which it passed were made to ring with the jubilant "war-whoops" of the victorious firemen. It is safe to say that it will be many a long day before the citizens and visitors to that northern town will forget the name of Napanee.

And by the way when the firemen

home early Friday morning arrived they had not got through celebrating yet. The ringing of the fire bell, and the music of the band, was taken as a means to announce to our citizens the success attained by the firemen. This early awakening of the citizens is probably quite excusable under the circumstances, as the firemen on this occasion certainly did credit to the good old town of Napanee, and the bubling jubilation of the boys had to find an outlet in some innocent amusement. The Gananoque firemen they would like a and band (and by the way they are account when due. all a jolly good bunch of sports) who came home with the firemen helped to

keep things humming.

A. E. PAUL, General Subscrip- LETTER OF CONGRATULATIONS FROM TOWN COUNCIL.

> The following letter from the Town Council has been received by the firemen, and they wish to publicly thank the council and the citizens for their many kind words of appreciation and congratulations:

August 4, 1914

Fred J. Vanalstine, Esq., Chief Excelsior Fire Brigade,

Napanee.

Dear Sir :- I am directed by Municipal Council of the Town of Napanee to write you congratulating you and the Fire Company upon the excellent showing made by the Firemen ae the recent contests in Lindsay. It is a source of gratification to the council and the citizens to know that the volunteer firemen are ready at all times to protect the citizens and their property against fires, and are in so efficient a state of organization that they are able to go forth and com-pete with fire brigades from many larger municipalities and come successful. The trophy which you have brought home you as an evidence of your success is a handsome one, and

The electors of Belleville yesterday voted upon a bylaw to confirm an agreement between the city and the Trenton Electric and Water Co., for the lighting of the city. The result was a victory for the bylaw.

SUSPENSE CONTINU

Britain Refrains From a Sta ment of Her Plans.

Sir Edward Grey Says He Has Ass ed France That England Will Permit the German Fleet to tack the Northern French Co -Distrusts German Bribe to I gium-Radicals Against War.

LONDON, Aug. 4. - Great Brit has mobilized her forces and awa events. To-day she is not a bellis ent power, nor is she a neutral o

The Government has given Fra armrance that the British fleet not permit the German fleet to atta the French coast. It has not pledged itself to contribute an ar to the continental war.

The British Government rega with the deepest distrust German violation of Belgium's neutrality, makes no declaration as to whet it considers that measure provo tion for war.

This pronouncement of the Gove ment's policy—the result of two da continuous deliberations was made to the House of Commo yesterday afternoon by Sir Edwa Grey, Secretary of State for Fore Affairs. Therefore the trying hour suspense for the British people prolonged indefinitely.

Meanwhile the German Embassy London is exerting overy effort to duce Great Britain to hold aloof fr the conflict and to bring public op ion to Germany's side. The couns lor of the German Embassy issued strong appeal for the neutrality Great Britain, asserting that Germa would agree to keep her fleet from attacking the northern and wester coasts of France if England wor pledge neutrality, and argued th England would gain more in the e by standing outside the Europe war and using her influence as me ator when the moment was ripe.

Referring to this suggestion, t

British Foreign Secretary said:
"I have only heard that shor
before I came to the House."

He raised his voice and rapped t table before him sharply, declarin "But that is far too narrow an egagement."

Sir Edward Grey dispelled t shadows of doubt which flicker over the Triple Entente in the min of many Liberals by exposing sor milestones in the history of the ra prochement, revealing it as essentially a national one with France, wit out definite obligations.

When the House reassembled t Foreign Secretary made his statment with respect to Belgium. I said:

message has been receive from the Belgian legation here, sta ing that Germany sent to Belgium seven o'clock last evening a note pr posing to Belgium friendly neutrali coupled with the free passa through Belgian territory of Germa troops, promising the maintenance Relgian independence at the concl sion of peace, and threatening, case of refusal, to treat Belgium an enemy. The time limit of hours was fixed for the reply."

This statement was received wirmurmurs from all parts of the Hous and then Sir Edward Grey continued

"Belgium answered that an attac on her neutrality would be a flagran violation of the rights of nation that to accept the German propos would be to sacrifice her honor, ar being conscious of her duty, Belgiu was firmly resolved to repel aggre Few are beautifully carved City.

Martial law was proclaimed yesterday over Boldera, Russia, and the mouth of the river and its vicinity. Steamers have to obtain special permission to pass in and out.

The Town Council of Breslau. Germany, yesterday voted an appropriation of \$5,000,000 for the pro-visioning of the civil population in case of the mobilization of the German army.

Crying revenge against the "tyranand oppression" of Russia, about 2,000 Poles and Ukranians, members of the revolutionary parties of these former principalities, held a mass meeting in Ottawa.

SATURDAY.

Joe, a white bulldog, seven years old, starved itself to death from grief at the loss of his mistress, Mrs. W. H. Payne, of Corning, N.Y.

Burglars broke into the Carlstadt station of the New Jersey & New York Railway station Thursday night and disappeared with a 200-pound safe.

Wm. J. O. Delaney, Toronto, will apply to Parliament for a divorce from his wife, Louisa Delaney, Toronto, on the statuary charge and desertion.

Fire destroyed the Grand Trunk Pacific pier and damaged the Colman dock in the heart of the Seattle water front, causing a loss estimated at \$500,000.

That no orders to fire were given to the King's Own Scottish Borderers at the time of the riot in Dublin, was stated yesterday by Major Haig, who commanded the detachment at the time.

Notice is given in The Canada Gasette of a special general meeting of the Metropolitan Bank shareholders

in Toronto on Sept. 14 to deal with the proposed sale of the bank to the Bank of Nova Scotia.

The President Grant of the Hamburg-American Line which sailed from New York Thursday has been recalled by wireless. The sailings of the Princess Luise and the Amerika, the latter now in Boston, have also been cancelled.

MONDAY.

Special prayers for peace in Europe were given in the various churches in Montreal yesterday, Protestant and Catholic.

D. D. Davidson, a prominent con-tractor of Newbern, lost his life in an

points. General Carranza moved southward from Tepeji Del Rio Sunday.

A severe earthquake shock was felt in Kingston, Jamaica, at 6.32 o'clock yesterday morning and caused considerable alarm among the inhabitants. Little damage, however, was reported.

The electors of Belleville yesterday voted upon a bylaw to confirm an agreement between the city and the Trenton Electric and Water Co., for the lighting of the city. The result was a victory for the bylaw.

AN APPEAL FOR HELP.

Belgium's Ruler Calls On Britain For Protection.

LONDON, Aug. 4.—The most important feature of the diplomatic situation in Europe yesterday was the appeal of King Albert of Belgium to Britain to preserve the integrity of his kingdom. The nessage to Bri-tain followed an offer from Germany to Belgium to recognize the latter's neutrality if she would permit the transportation of German troops across her territory. This was firmly refused, and King Albert sent the fol-lowing telegram to Britain:

"Remembering "Remembering the numerous proofs of Your Majesty's friendship and that of your predecessor, of the friendly attitude of England in 1870, and the proof of the friendship which she has just given us again, I make a supreme appeal to the diplomatic intervention of Your Majesty's Government to safeguard to integrity of Belgium."

MOBILIZING IN BERLIN.

City Is Active But Little Excitement Prevails.

BERLIN, Aug. 4. — The mobiliza-tion of the German army proceeded yesterday with absolute calm. There were few signs in Berlin that anything extraordinary was happening, with the exception of great crowds at the railway stations and the lack of taxi cabs, half of which had been requisitioned by the army authorities. An open air religious service, attended by many soldiers in marching kit, was held yesterday around the Bismarck monument, outside the Imperial Parliament House. All joined in the Lord's Prayer.

A notice was issued by the police stating that the Emperor's strength and time were absorbed by the work imposed on him in this serious hour and that it was not proper for him to be disturbed by popular demonstrations.

In accordance with the imperial constitution the Kings of Bavaria, Saxony and Wuertemberg have placed their armies under the command

of Emperor William.

inrough Beigian territory of Germ troops, promising the maintenance Belgian independence at the concl sion of peace, and threatening, case of refusal, to treat Belgium an enemy. The time limit of hours was fixed for the reply."

This statement was received wi murmurs from all parts of the Hou and then Sir Edward Grey continue

"Belgium answered that an atta on her neutrality would be a flagra violation of the rights of nation that to accept the German propos would be to sacrifice her honor, a being conscious of her duty, Belgiu was firmly resolved to repel aggresion by all possible means."

The Belgian reply was receive with loud cheers by the members, as

Sir Edward concluded with the d claration that the British Governme had taken the situation into gra consideration and that he make no further comment.

The mobilization of the Briti naval reserves was completed yeste day morning, according to a statement issued by the Admiralty. Hu dreds of sailorner anticipated t orders which were given only Su day evening and the streets were fu of them Sunday, wearing their un forms and carrying kit bags. The public supposed they had summon to the ports, whereas they were on so eager that they proposed to be pr pared to jump on the trains at t first signal.

The mobilization of the army w begin to-day. It includes regular reserves and territorials.

A proclamation has been issue authorizing the Admiralty to requis-tion British vessels in home water The Shipping Gazette, has disconti ued the publication of sailings fro British and Continental ports lest gives information to a possib enemy.

PANIC IN HOLLAND.

Order To Mobilize Causes Run o

Banks and Food Shops. Germany Explains Seizure of Ship LONDON, Aug. 4. — The Germa Embassy here yesterday issued the following explanation of the recei interference with British ships t common war vessels: "This actic was merely a police measure an there was no intention on the part of Germany of interfering with the property of the vessels. The Castro was ordered to Hamburg because it was undesirable that any commercial ve sel be in the Kiel Canal, while in the case of the Saxon the German Go ernment had purchased the coal o board from the firm to which it wa consigned, and had altered the detination of the vessel to Hamburg.

New South Wales Guards Cables. SYDNEY, N.S.W., Aug. 4. — Th Commonwealth Government has tal en steps to protect the cable statio and guard the wireless stations. Th forts are being manned. These mea sures require a partial mobilizatio of the citizen forces.

The port of Sydney will be close each night. All vessels entering th defensive ports of Australia will b subjected to a special examination.

Would Send Money to Americans. NEW YORK, Aug. 4.— Use of United States warship to carry t Europe \$3,500,000 in gold for th relief of stranded American tourist was proposed by New York banker yesterday, and Benjamin Strong, ir president of the Bankers' Trust Co let for Washington to make th suggestion to President Wilson.

Dirigibles Invade Belgium.

BRUSSELS, Aug. 24.—The Frenci Minister has informed the Belgian Government that three German dirig ibles were observed last night flying towards Brussels, have invaded Bel gian territory.

ritain Refrains From a Statement of Her Plans.

r Edward Grey Says He Has Assured France That England Will Not Permit the German Fleet to Attack the Northern French Coast -- Distrusts German Bribe to Belgium-Radicals Against War.

LONDON, Aug. 4. - Great Britain s mobilized her forces and awaits ents. To-day she is not a belligert power, nor is she a neutral one. The Government has given France mrance that the British fleet will t permit the German fleet to attack French coast. It has not yet edged itself to contribute an army the continental war.

The British Government regards th the deepest distrust Germany's plation of Belgium's neutrality, but tkes no declaration as to whether considers that measure provoca-

n for war.

This pronouncement of the Governnt's policy-the result of two days' continuous deliberationss made to the House of Commons sterday afternoon by Sir Edward ey, Secretary of State for Foreign airs. Therefore the trying hour of ipense for the British people is plonged indefinitely.

Meanwhile the German Embassy in ndon is exerting overy effort to ince Great Britain to hold aloof from conflict and to bring public opin-to Germany's side. The counselof the German Embassy issued a ong appeal for the neutrality of eat Britain, asserting that Germany uld agree to keep her fleet from acking the northern and western sts of France if England would dge neutrality, and argued that gland would gain more in the end standing outside the European r and using her influence as medi-

German Movement Into Luxemburg Goes On.

It Is Believed That Germans Intend to Cross Belgium In Order to Cut Off the Paris-Calais Route-Keen Suspense Prevails In Antwerp Which Is In a State of Siege-Libau Is Bombarded.

BRUSSELS, Aug. 4. - At four o'clock yesterday afternoon the Germans were still pouring troops into Luxemburg. A force of 100,000 is already massed along the Belgian frontier opposite Dinant. An unconfirmed report was received that the Germans are massing another army on the frontier of Limburg.

May Cut Off Paris-Calais Route. LONDON, Aug. 4.—The dominant idea of Belgian mobilization is that Germany will attempt to force a passage across the narrow neck of Belgian territory below Liege and Namur, the main route from Cologne and Aix-la-Chapelle into northern To capture France above Rheims. this route southward would mean the cutting off of the Paris and Calais route from the main French forces.

Antwerp In State of Siege. ANTWERP, Aug. 4. — All tele-phonic and telegraphic communications with the interior are stopped except for war purposes, and all messages are censored. There is no confirmation of the engagement between the French and Germans at Nancy. Tidings of the occupation by the German troops of the Duchy of Luxemburg and of their crossing the frontier into Belgium were received here in an agony of suspense, but with unflinching courage and calm. Business is at a complete standstill, and all the large shops and offices are shut. In every public place notices are posted, signed by the Burgomaster, declaring that Antwerp is in a state of siege and appealing to his fellow-citizens to preserve order. There are no signs of panic, though every family has the flower of its manhood at the front.

Germans Take Polish City.

BERLIN, Aug. 4. - The German border troops from Lublinitz, Silesia, yesterday, after a short skirmish with Russians, took possession of Czenstochowa, Russian Poland.

Benzin and Kalisz, Russian Poland, also have been occupied by the Germans.

The Germans completely surprised the garrison at Czenstochowa, and before the Russians realized what before the Russians realized what was at hand they hid been almost completely surrounded. The German artillery shelled the fortifications sharply, after which the cavalry and mounted infantry charged and soon were in complete possession.

Germany Bombards Libau.

BERLIN, via B. ussels, Aug. 4 .-The small cruiser Augsburg has sent the following report to Berlin by wireless:

Am bombarding the naval harbor at Libau, and am engaged with the enemy's cruiser. The naval port of Libau is in flames."

Libau is one of the principal seaports of Russia, and is located on the Baltic Sea one hundred miles or more north of the German coast.

It is fortified and is used as an

arsenal by the navy.

The German protected cruiser Augsburg is of 4,280 tons displacement, and her chief armament consists of twelve 4.1 inch guns. Her crew aggregates about 400 men.

No Naval Engagement.

BERLIN, Aug. 4 .- The report circulated in London yesterday that there had been a naval engagement in the North Sea between British and German warships is untrue.

Aviators Fight In Mid-Air.

LONDON, Aug. 4.—The Standard bys: "In the engagement between says: French and German troops yesterday near Longwy, a German aeroplane was noticed making observations of the French position, when a French aviator made an ascent, flew about the German aeroplane and descended to the level behind him.

The French aviator shot the German airman with a pistol injuring him and causing him to lose control of his machine, which fell to the ground from a height of 300 feet and was destroyed. The German aviator was killed by the fall."

Tried to Poison Wells.

LONDON. Aug. 4. -- Telegrams from the chief of the German general staff received at the German embassy here assert that a French docwith two assistants, tried to poicon the wells near Metz, with cholera microbes. The three were captured by the Germans and then shot.

SOUTH AFRICA LOYAL.

New Union Has a German Problem of Her Own.

CAPE TOWN, South Africa, Aug. 4.—The Cape Town Union says: "We would demand the immediate bilization of a defence force of 30,-000 if Britain were involved and doing her utmost in these interests of the Empire. The South African posi-tion differs from that of the other We have four million dominions. natives to consider, also the German territory on our borde s. The South African gold question is vitally important to the Empire. It is considered in official circles that it may be advisable to retain the gold in South Africa until the seas are cleared. Canada's and New Zealand's action is heartily approved by the press.

Bonaparte Offers To Fight.

PARIS, Aug. 4. — Prince Roland Bonaparte, a former lieutenant of infantry in the French army, and a member of the French Institute, who is 56 years of age, offered, in a letter sent to President Poincare yesterday, to serve in the army, although, he said, he realizes that the law probits princes of a family once reigning in France from enlisting.

Deafness Cannot be Cured.

Deafness Cannot be Cured.

by local applications, as they cannot reach the
diseased portion of the ear. There is only one way
to cure deafness, and that is by constitutional
remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you
have a rumbling sound or imperfect hearing,
and when it is entirely closed, Deafness is the
result, and unloss the inflammation can be
taken out and this tube restored to its normal
condition, hearing will be destroyed forever;
nine cases out of ten are caused by Catarrh
which is nothing but an inflamed condition of
the mucous surfaces.

We will give One Hundred Dollars for any
case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for

Europe, and in vie , of the action of the Imperial Government for conserving the financial and commercial interests of the United Kingdom, the Minister of Finance announces on behalf of the Dominion Government, that while it is not probable that such action on its part will be required, it stands ready to issue Dominion notes to such amount as may be necessary against securities deposited by the banks and approved by the Minister of Finance."

"The Minister of Finance further announces that the Government has authorized the chartered banks of Canada to make payments in bank notes instead of gold or Dominion notes until further official announcement in that behalf. This action will tend to conserve the Canadian gold supply against demands from foreign sources, a course now being followed by all the leading nations of the world.

"The Minister further announces that the Government has authorized the chartered banks of Canada to issue excess circulation to an amount not exceeding 15 per cent. of their combined, unimpaired, paid-up capi-tal and rest or reserve fund from this date until further official announcement.

"Any necessary special legislation will be obtained at the next session of Parliament.
"The Minister further announces

that the Government is prepared, if necessity should arise, to give every other possible assistance in order to prevent any avoidable interruption of stable business conditions, and for this purpose it will not hesitate to use to the fullest extent all existing powers, and to ask further powers from Parliament if that course should seem necessary or expedient.

When the Cabinet rose at 10.40 o'clock last night the Prime Minister stated that he had no further announcement to make. He had received no news from the Imperial Gov-

Yesterday was a day of suspense such as the capital had never seen before. The report of Sir Edward Grey's speech in the British Commons was read with profound interest and it was felt that now it was only a matter of a very short time, perhaps only a matter of hours, before Britain would be involved in the great European struggle and Canada's part would be to take her place by Britain's side. There were conferences among the Ministers yesterday morning and the Cabinet met both afternoon and evening. They received copies of all press despatches received by cable during the day.

A number of important steps were taken yesterday in preparation for the impending crisis. These included precautionary measures to protect the financial system of the country, the establishment of a system of censorship, including a chief censor and a representative in each of the cable offices, the placing of the shipping passing up and down the St. Lawrence under military supervision, and the calling for volunteers from ex-navy men to man the cruiser Niobe.

There was a report here last night that the Government was negotiating for the purchase of three Dreadnoughts now being built in British shipyards for Turkey and Chile. They would be ready in six months. Parliament would be called to vote the money to pay for them.

event of the mother country becoming involved in actual hostilities, to organize and equip a battalion of organize and equip a battaion of infantry 10,000 strong, and offer it through the proper channels at Ot-tawa to the home authorities, as a slight evidence of Manitoba's appreciation of being a part of the Brit-ish Empire."

Col. Steele, D.O.C. for this district, say: there will be no difficulty in raising 10,000 men from this district

Flour and Sugar Go Up.

MONTREAL, Aug. 4 .- Flour and sugar prices have gone up.

A bulletin received yesterday afternoon states that the flour millers have advanced the prices by 30 cents a barrel, owing to the increased demand from wholesalers and retailers. Sugar has made an advance of 10 cents per hundred pounds for the same reason.

South Africa With Britain.

AMSTERDAM, Aug. 4 .- That Holland is in the midst of war is very evident here. On all sides there are signs of military preparations. The mobilization order by Queen Wilhelmina was so readily answered that the operation was soon completed. The peaceful streets of sleepy Dutch cities present an unwonted aspect. Troops are constantly moving and are being lodged in the public buildings. The mobilization decree caused a panic among the poorer classes, and there was a frantic run on savings banks; crowds besieged the shops for food supplies and the excitement increased when the post-offices, railway and commercial offices, railway and commercial houses refused to give coin for notes.

CROTHERS' LATEST TRICKERY.

How Borden's Minister of Labor Treated Street Car Workers in St. John-The Same Old Story.

Is there no limit to the insolent in-difference of Hon. T. W. Crothers to the interests and wishes of Labor and to the responsibilities of his position as Minister of Labor in the Borden Government? Since he took office, Mr. Crothers has trifled with his responsibilities, ignored the desires and interests of Labor, flouted their claims and displayed an utter lack of sympathy with the workingmen. His conduct in connection with the recent strike of street car employees in St. John, N. B., brought one more proof

John, N. B., brought one more proof of his inefficiency and wanton dis-regard of the public interest.

When the strike was brewing, Mr. Crothers was in Halifax. He was waited upon by Mr. Sidney Mosher, a representative of the St. John men, and urged to visit the New Brunswick city and attempt a sattlement of the city and attempt a settlement of the trouble. Mr. Crothers gave his prom-ise. To quote Mr Mosher's statement the Minister "promised that he would come to St. John without fail and re-main here on Wednesday to talk over this matter and do his utmost to arrange a settlement."

Wednesday came, but no Mr. Crotheis. Instead of going to St. John when he left Halifax, the Minister changed his route of travel at Moncton

and went on to Ottawa.

"I took it that he would carry out his promise," said Mr. Mosher, when the trickery of the Minister was realized, "but you see he hasn't. He's given us the slip; that's all there is to it-just slipped away to avoid the trouble."

The next evening there were riots in St. John. Several men were injured. The military were called out. And Mr. Crothers, Minister of Labor, the man who had promised to visit St. John and "do his utmost to arrange a settlement" of the threatening trouble had slipped on to Ottawa without lifting a finger to adjust a difficulty and prevent the possibility of such disturb-

Borden Government to aboush the duties on wheat and wheat products as proposed by the Liberals during the last session of Parliament. The re-fusal was based chiefly upon the con-tention that the maintenance of the flour duty was necessary to protect Canadian millers in the home market.

Trade statistics recently issued at Ottawa show that during the fiscal year 1913-14 the Canadian millers not only had practically a monoply of the home market but carried on a huge export business as well. During the year, the flour imports were valued at less than \$250,000 while the export of the Canadian-milled product totalled 4,832,000 burrels with a value of \$20,851,000—an advance of 354,000, in barrels, and \$610,000, in value, over the preceding year. Indeed, for some years past there has been a very considerable increase in Canadian flour

Moreover, it has been conclusively shown in Parliament that Canadian flour is sold more cheaply in Great Britain than to the people of the Dominion. In other words the Canadian milling interests hold a monopoly in favors and take advantage of that the Canadian consumer than they charge for their product after it has been shipped to a market thousands

of miles distant.

The abolition of the duties on wheat and wheat products would serve several useful purposes. It would enable Canadian wheat growers to send their product into the United States dutyfree under the Wilson-Underwood tariff It would give them three dutyfree markets instead of the two now open to them. On the other hand, it would provide competition in the flour business and put an end to the present monopolistic condition under which Canadian millers take excessive profits from the Canadian consumer while selling their flour at much lower prices abroad. The enormous busi-ness now done by Canadian milling companies in competition with the mil's of other nations in distant mar-kets is guarantee that they would have no reason to fear competition at home. The Liberals, by advocating by advocating the abolition of these unnecessary and hampering duties sought to increase the business/opportunities of the Canadian for tunities of the Canadian farmers and to lower the cost of living to all classes in the Dominion.

When the milling companies declared hostility to the Liberal proposal, Sir Robert Borden and his colleagues promptly followed their lead. The interests of the farmers and the consumers counted for nothing in the eyes of the Government. "We must save the milling industry," was the Ministers' cry, which would have been all been very well if the industry had

JAPANESE MONEY.

Yens, Sens and Rins Complete Their Simple Currency System.

The Japanese currency system is very simple and is based upon a gold basis. The unit of value is a ven. This equals 50 cents in gold, according to our United States values. One yen is divided into 100 sen. Each of the latter is worth just one half of an American cent. The Japanese sen is the equivalent of 10 rin, and the smallest Japanese coin consists of a five rin piece, the equivalent of one-quarter of an American penny.

The currency media is composed of paper notes, silver, nickel and copper. The Japs have their paper money in one, five, ten yen notes and upward. The silver money comes in ten, twenty and fifty sen pieces. The smallest nickel piece is valued at 5 sen. Then come the copper coins. These are valued at 2 seu, 1 sen and 5 rin.

This is the substance of the entire currency system in Japan when you step into a money changer's to procure the coin of the realm. But you do not always obtain the equivalent in values for your American currency. The various seaport towns swarm with Chinese money changers. These Mongolian financiers deduct a rebate of from 1 to 2 per cent for every \$10 in American money exchanged. When you travel in the interior localities of Japan, away from the beaten track of tourist traffic, you will be compelled to pay even a higher rate of exchange, as the Jap merchants refuse to accept foreign coin in exchange for their wares unless they are easily accessible to some nearby seaport town.

The Jap nickel, or five sen piece, will buy five or six times as much for a Jap in his own country as the same value of currency would buy for an American home in the United States. The simplicity of the native currency system goes hand in hand with the frugality and the wise economies of these quaint, active little people.-Philadelphia North American.

HER MISSING NECKLACE.

Saint-Hilaire Finally Awoke and Restored It to His Wife.

The innocent ignorance of much engrossed men of science as to ordinary matters is illustrated by an amusing anecdote of Geoffroy Saint-Hilaire the younger. Saint-Hilaire was accustomed to bury himself in his laboratory, where he did not allow the affairs of his household to disturb him, and Mme. Saint-Hilaire was careful to guard him against all worry of domestic matters.

In his laboratory he was accustomed, being a naturalist, to have various strange animals, after the fashion of Rossetti. Of these a monkey was his favorite. His wife possessed a necklace of diamonds, of which she was naturally proud. One day this necklace was missing. Madame was in despair and had the house searched, with the exception of Saint-Hilaire's room. She knew his dislike of being disturbed, and moreover she had not entered this room for a long time, so that she could not have left the diamonds

A few days later at one of Mme. Saint-Hilaire's "at homes" her husband appeared, and a woman among the guests who supposed he knew of the disappearance of the diamonds asked him if they had been found.

"What diamonds?" he asked. He called his wife and questioned her.

FLYWHEELS IN WARFARE.

As Projectiles They Would Mow Dov Everything In Their Way.

A big flywheel spinning rapidly i colves a much greater danger than th of merely exploding. The explosion i flywheel is due to centrifugal for and causes pieces of the wheel to off at a tangent in the plane of t wheel, but in practically every dire ion in this plane. But consider for noment what would happen if a f wheel were to become loose from vearings and stay whole.

The great velocity of rotation wou be changed to velocity of translation and the wheel would travel with ligh uing swiftness along the floor in t lirection of rotation. It would act li a locomotive wheel going at treme lous speed. Of course, if it were trop in a puddle of oil it would not far, but simply slip like an engi wheel on an oiled track. But with oil to check its course the results wou be awful to contemplate.

Suppose that the wheel was for feet in circumference and was rotati at 1,800 revolutions a minute. A poi on the wheel would then be traveli 72,000 feet a minute, or about 800 mil an hour. This is as fast as a cann ball and, of coarse, the wheel wor act in a similar manner to a cann-

his promise," said Mr. Mosher, when the trickery of the Minister was reali-zed. "but you see he hasn't. He's zed, "but you see he hasn't. He's given us the slip: that's all there is to it—just shipped away to avoid the trouble."

The next evening there were riots in St. John. Several men were injured. The military were called out. And Mr. Crothers, Minister of Labor, the man who had promised to visit St. John and "do his utmost to arrange a settlement" of the threatening trouble had slipped on to Ottawa without lifting a finger to adjust a difficulty and prevent the possibility of such disturbances as took place. Next day a settlement was reached through the efforts of the local men in St. John and when everything was about over, Mr. Crothers wired from Ottawa that he was leaving for New Brunswick to

When certain employees of the Canadian Pacific desired the appointment of a Conciliation Board a year or so ago, Mr. Crothers refused the appointment until, eventually, his hand was forced. When the board, by a majority vote, found in favor of the men Mr. Crothers refused to lift a hand to influence the company towards ving prompt effect to the findings. When trouble broke out in the Vancouver Island coal mines, Mr. Crothers played with the difficulty and, finally, when the situation was most acute and violence had broken out, he hied himself off to England on a junketting trip at public expense. Now, when a serious difficulty arises in St. John. he breaks his promise to the men and slips back to Ottawa without making a move to bring about a settlement. After rioting has occurred, is at an end, and an adjustment of the trouble has been made by local agencies, Mr. Crothers telegraphs from Ottawa that This is the kind of he is all action! man Sir Robert Borden foistered upon man Sir Robert Borden roistered upon Canada as Minister of Labor and con-tinues in office! This is the kind of treatment Labor receives from the Tory-Nationalist Government!

The importance of enthusiastic im-migration was one of the features of the time of Laurier rule. The deportation of disheartened unemployed is featuring the days of Borden mismanagement.

A few months ago, soldiers were called out when Labor difficulties became so serious on Vancouver Island. came so serious on Vancouver Island.
A week ago, soldiers were called out
in St. John, N. A., to put down rioting which followed Labor difficulties
there. When the Vancouver situation was acute, Hon. T. W. Crothers
was pleasuring in England. When a
settlement of the St. John
troubles
was being south. Hon. Mr. Crothers was being sought, Hon. Mr. Crothers slipped by the city, though less than a hundred miles away at the time, rather than put forth an effort to adjust the difficulty, as he promised to do. Great is Borden's Minister of Labor! hundred miles away at the

THE FLOUR BUSINESS AND THE TARIFF.

The Party Policies Considered in the Light of Trade Statistics.

Some of the trade figures for fiscal year which ended last March are of special interest when considered in connection with the refusal of the

by advocating the abolition of these unnecessary and hampering duties sought to increase the business opportunities of the Canadian farmers and to lower the cost of living to all classin the Dominion.

When the milling companies declared hostility to the Liberal proposal. Sir Robert Borden and his colleagues promptly followed their lead. The interests of the farmers and the consumers counted for nothing in the eyes of the Government. "We must save the milling industry," was the Ministers' cry, which would have been all been very well if the industry had been in need of assistance. Instead of needing aid, however, the milling luterests have a fat monopoly in Canadian market and made a huge profit from a great export business though it sells flour more cheaply abroad than in the Dominion—and statistics establish these facts. But placed in power by allied Special Interests, the Government spares no effort to protect them even though the welfare of the people is sacrificed in the endeavor, as it was when the abolition of the wheat and flour duties was refused.

Pretty Useful Shoes.

It would be difficult to realize what the Frieslander would do without his klompen or wooden shoes, for they have a hundred uses. With them he bails out his boat, corrects his children and scoops up a drink of water wherever he may be. He places in them his worms for fishing, uses them as missiles in a free fight, measures dry goods with them and a hundred other things. The klompen are cheap. They cost about fifteen pence a pair, man's size, and Dutchmen's feet are not Cinderella-like by any means .-Wide World Magazine.

Overheard by Thackeray.

The discomforts endured by Thackeray in the United States, which he dwells upon in the letters to Mrs. Brookfield, were alleviated by some amusing incidents. After his return to London he told Carlyle that during one of his American journeys "the train stopped at Concord. Then one of the two silent Yankees opposite me turned to the other and remarked, 'Mr. Emerson, I hear, lives in this town.' 'Ye-as.' was the drawling rejoinder, 'and I understand that, in spite of his odd notions, he is a man of consid-er-able property."

What He Was Looking For.

'I do wish, Edward," said the lady

"On the contrary, my dear," repli-ed the resourceful benedict, "I was looking to see if I could find a prettier face than yours, and I confess I really cannot."

Justifiable.

"Why did you beat Dobson so terribly?" said the judge, indicating the bebandaged figure of the plaintiff.

"I asked him why a horse had run away, your honor," explained the prisoner, "and he told me that it was because the animal had lost its equineimity."

"H'm," said the judge. "Discharged."

Concession.

"Don't you think men ought to have a voice in a political campaign?

asked Mr. Meekton.
"Certainly," replied his wife. "Every glee club should have a few bass voices in it." ---

the exception of Saint-Hilaire's room. She knew his dislike of being disturbed, and moreover she had not entered this room for a long time, so that she could not have left the diamonds

A few days later at one of Mme. Saint-Hilaire's "at homes" her husband appeared, and a woman among the guests who supposed he knew of the disappearance of the diamonds asked him if they had been found.

"What diamonds?" he asked. called his wife and questioned her. "What sort of a looking thing was this that you have lost?"

She described the diamond necklace.

"Ah," said the zoologist, "for several days my baboon has had in his possession, generally worn about his neck, s similar thing to that described."

"But why did you not tell me?" his wife exclaimed in indignation.

"Why," answered Saint-Hilaire. supposed that it belonged to him. He seemed to be very fond and proud of

Law of Falling Bodies.

A falling body having fallen during one exact second falls 16.1 feet. the precise end of the second it has acquired a specific velocity of 32.2 feet per second. This carries it 32.2 feet during the second second, and this added to 16.1 feet equals 48.8 feet distance fallen during the two seconds. And at the exact end of the second second the acquired velocity is 64.4 feet per second, and so on.-New York American.

Lover of Poetry.

"Too bad about poets, isn't it?" "What's too bad-their poetry?"

"No, no; the fact that it doesn't pay to write poetry. I'm told they're mostty always very poor."

"You mean their books don't sell?"

"That's it. It's too bad."

"You like poetry?"

"I love it. I read all I can get."

"You buy the books, of course?" "Oh, dear, no! I can get 'em all from the library!"

Seldom Misses.

Two "good fellows" were ambling home at an early hour in the morning after a festive evening.

"Doesn't your wife miss you on these occasions?" asked one.

"Not often," replied the other; "she throws pretty straight." - Cleveland Leader.

Where They Differed.

"I always try to look at everything from both sides."

"Your wife tells a different story." "How's that?"

"She says you haven't seen the inside of a church for years."-Chicago Record Herald.

Made It Short.

Newedd-What's wrong with this ple crust? It doesn't half cover the pie. Mrs. Newedd-Why, dearest, I asked your mother all about how to make them to suit you, and she said to make the crust very short.-Boston Tran-

Precept and Practice.

"What's the matter with your wife?" "She has fretted herself into a sick headache over her paper for the Don't Worry club."

One shrick of hate would jar all the hymns of heaven.-Tennyson.

lous speed. Of course, if it were trop in a puddle of oil it would not far, but simply slip like an eng wheel on an oiled track. But with oil to check its course the results wo be awful to contemplate.

Suppose that the wheel was fo feet in circumference and was rotat at 1,800 revolutions a minute. A po on the wheel would then be travel 72,000 feet a minute, or about 800 m an hour. This is as fast as a can ball and, of coarse, the wheel wo act in a similar manner to a cant ball-it would be a mighty projec that would go through almost a thing. It is this danger which ke the size and speed of flywheels do in practice, especially aboard ship.

It is possible that projectiles will be made on this principle for cert purposes. Think what an army co do at short range if it was equip with hundreds of big flywheels t could be released. They would tra along the ground at great speed a would simply mow down everything their way. The only drawback to use of flywheels in this way is the sistance of the ground, and that wo not hold for a distance as short as b a mile.

While an ordinary projectile hits one spot only, the flywheel would co an area as wide as the wheel and long as the path over which it travel Therefore it is hardly possible that a wheel would become spent without ing great damage. It could be pre accurately aimed and, on account of gyroscopic effect, would travel in pr tically a straight line. Its gyrosco effect would not, however, keep it fr going up or down a hill, but would ; vent it from deviating from its pa otherwise.

Defense against such a projec would be hard to get .- New York An

A DREAM AND A LETTER.

Maybe Merely a Coincidence, Maybe Spirit Message.

The following story of a dream w told to a correspondent by an acquai ance who is about as stond and uni aginative a man as one could meet:

He had a friend of whom he had ! sight of for some time. This frie committed suicide and one night, so after he had done so, the unimaging tive man dreamed that he was wa ing along a street after dusk when bust of the dead man appeared to b and requested him to follow it. He so, and it led him to a house, the de of which was open, and then up so stairs to a room where there was table on which lay a number of boo all of which were lying open.

The dead man had been a great re er and therefore there was nothing usual in the spectacle of a great ma books in his room. The bust turn to the unimaginative man and begg him to turn over a page of each bo so that it might continue to read. did so, and he remembers that bust became petulant when he turn over two pages in mistake. When the pages were turned the bust appe ed to be happy.

The dreamer awoke and told his w about it. When he went down breakfast he found a letter lying the table bearing the postmark of town of which he had no knowled

other than its name. He had never been there, nor, so far as he was aware, had the dead man, nor had he any friends or relatives in the town. The only relative of the dead man of whom he had any knowledge lived in another city.

When he opened the envelope he found inside it a small photograph of the dead man, showing his bust only. There was not any letter inclosed with it, nor anything to denote by whom it had been sent, and to this day he does not know from whom he received it—Manchester Guardian.

ONE OF IRVING'S POSES.

His Role of Defeated Candidate In Labouthere's Borough.

An amusing episode of the Middlesex elections of 1868 was the error that the supporters of Henry Labouchere made in taking Henry Irving for their defeated candidate. The story is told by Mr. Algar Labouchere Thorold in his "Life of Henry Labouchere," as Mr. Labouchere himself narrated it:

"I was the defeated candidate for Middlesex. Those were the days of husttings and election displays, and it was the fashion for each candidate to go down to Brentford in a carriage and four to thank his supporters. On the morning of the day when I had to per-

HE WAS A MIGHTY KING.

If the Record on the Tomb of Sardanapalus Be True.

An ancient legend tells us that Sardanapalus was the founder of Tarsus, while others ascribe that honor to Senacherib, king of Nineveh, of whom the Bible record speaks. An interesting part of this legend about Sardanapalus, the last of the Assyrian kings, tells us that he recorded on his tomb near Anchiale, a nearby city, in one day, a feat surely worthy of any king. But the kings of those days, it must be remembered, took as much license with the record on their tombs as any Munchausen who ever lived.

We are also told that on this tomb was a statue of the king snapping his fingers, while this inscription was written beneath: "Sardanapalus, son of Anakyndaraxes, built Anchiale and Tarsus in one day. Eat, drink and play, for everything else is not worth this" (a snap of your fingers).

Whether this statue and its description are purely mythical or not, the tradition was probably current in Paul's time, as his own words indicate: "If after the manner of men I have fought with beasts at Ephesus, what advantageth it me if the dead rise not? Let us eat and drink, for tomorrow we die." What greater contrast could there be than between the strenuous, manly, undaunted apostle and the voluptuous, blase king who was said to have founded the city where, hundreds of years later, St. Paul was born?—Christian Herald.

BEST OF ALL JOURNALISTS.

St. Mark Has Been Called the Reporter Among the Apostles.

The greatest journalist the world ever knew lived 1,500 years or more before the invention of type, according to Rev. Dr. Frank N. Palmer, who awarded the palm to St. Mark and wondered at the marvels that he might have accomplished if he had lived in the days of printing presses.

St. Matthew put his chronicles in twenty-eight chapters; St. Luke used twenty-four to tell his story; St. John used twenty-one, but St. Mark covered all the details more vividly in sixteen, and, true to the spirit of action that animates his kind, put a miracle in every chapter.

St. Mark, Dr. Palmer said, was the reporter among the apostles. His view-point, his language and his marvelous ability to give action and climax, clash and color in a sentence should be a glowing example to the newspaper writers of this day.

Each of the other apostles speaks of skies that opened. Mark says they were rent asunder. He is the only one among his brethren who stopped dutifully to describe the color of a given scene. In the writings of his fellows it is told that the people went to the Sermon on the Mount. Mark writes vivid-

ly that the people ran.

In writing for the Romans he used colorful allusions and the references to wild beasts to touch their intelligence in sympathetic fashion at every stroke.

WOMAN WEAK AND NERVOUS

Finds Health in Lydia E. Pinkham's Vegetable Compound.

Creston, Iowa.—"I suffered with female troubles from the time I came into

womanhood until I had taken Lydia E. Pinkham's Vegetable Compound. I would have pains if I overworked or lifted anything heavy, and I would be so weak and nervous and in so much misery that I would be prostrated. A friend told me what

your medicine had done for her and I tried it. It made me strong and healthy and our home is now happy with a baby boy. I am very glad that I took Lydia E. Pinkham's Vegetable Compound and do all I can to recommend it."—Mrs.A. B. Boscamp, 504 E. Howard Street, Creston, Iowa.

Tons of Roots and Herbs

are used annually in the manufacture of Lydia E. Pinkham's Vegetable Compound, which is known from ocean to ocean as the standard remedy for female ills.

For forty years this famous root and herb medicine has been pre-eminently successful in controlling the diseases of women. Merit alone could have stood this test of time.

If you have the slightest doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass., for advice. Your letter will be opened, read and answered by a woman, and held in strict confidence.

A NOTE IN SCHOOL

One or Receive One?

Did you ever get a note in school?—from a boy?—from a big boy?—I suppose there are other experiences in life that are comparable to this, but sertainly there is nothing else at that time which combines the same elements—dramatic, embarrassing, gratifying, triumphant, delicious, queer. Not that there was anything in such a aote—the outside, as the missive first came to view, was much more thrilling than the contents.

But the very sight of it-pencilled on rough blulsh scratch paper, and ragged adged and rumpled-as it was shaped across an intervening space or offered slyly behind a geography or dropped on the desk as the writer went up to the A spelling class, gave a sensation not to be duplicated in any later years.

The contents, I regret to say, were insignificant, negligible. It is to be hoped that the big boy learned more about the art in time. But the mere fact of getting such a note, of having it written to yourself, of forecasting the contents, of having the other girls see you get it, all that in addition to the exciting fear that the teacher might see—once she made a girl read a note out loud!—filled the moment

ous speed. Of course, if it were to rop in a puddle of oil it would not go ir, but simply slip like an engine heel on an oiled track. But with no I to check its course the results would

a wful to contemplate.

Suppose that the wheel was forty et in circumference and was rotating t 1,800 revolutions a minute. A point i the wheel would then be traveling 2,000 feet a minute, or about 800 miles n hour. This is as fast as a cannon ill and, of coarse, the wheel would ct in a similar manner to a cannon ill-it would be a mighty projectile nat would go through almost anying. It is this danger which keeps ie size and speed of flywheels down practice, especially aboard ship.

It is possible that projectiles will yet made on this principle for certain irposes. Think what an army could at short range if it was equipped ith hundreds of big flywheels that ould be released. They would travel ong the ground at great speed and ould simply mow down everything in leir way. The only drawback to the se of flywheels in this way is the restance of the ground, and that would ot hold for a distance as short as half mile.

While an ordinary projectile hits in ie spot only, the flywheel would cover a area as wide as the wheel and as ng as the path over which it traveled. herefore it is hardly possible that any heel would become spent without dog great damage. It could be pretty curately aimed and, on account of its roscopic effect, would travel in praccally a straight line. Its gyroscopic fect would not, however, keep it from oing up or down a hill, but would preent it from deviating from its path

Defense against such a projectile ould be hard to get .- New York Amer-

A DREAM AND A LETTER.

aybe Merely a Coincidence, Maybe a Spirit Message. The following story of a dream was

ld to a correspondent by an acquaintce who is about as stolid and uniminative a man as one could meet: He had a friend of whom he had lost ght of for some time. This friend mmitted suicide and one night, soon ter he had done so, the unimaginare man dreamed that he was walkg along a street after dusk when the ist of the dead man appeared to him id requested him to follow it. He did , and it led him to a house, the door which was open, and then up some airs to a room where there was a ble on which lay a number of books, l of which were lying open. The dead man had been a great read-

and therefore there was nothing unual in the spectacle of a great many oks in his room. The bust turned the unimaginative man and begged m to turn over a page of each book that it might continue to read. He d so, and he remembers that the ist became petulant when he turned er two pages in mistake. When all e pages were turned the bust appearto be happy.

The dreamer awoke and told his wife out it. When he went down to eakfast he found a letter lying on e table bearing the postmark of a wn of which he had no knowledge

Children Cry FOR FLETCHER'S CASTORIA elections of 1868 was the error that the supporters of Henry Labouchere made in taking Henry Irving for their defeated candidate. The story is told by Mr. Algar Labouchere Thorold in his "Life of Henry Labouchere," as Mr. Labouchere himself narrated it:

"I was the defeated candidate for Middlesex. Those were the days of husttings and election displays, and it was the fashion for each candidate to go down to Brentford in a carriage and four to thank his supporters. On the morning of the day when I had to perform this function, Irving called upon me, and I invited him to accompany me. Down we drove. I made an inaudible speech to a noisy mob, and we

re-entered our carriage to return to "In a large constituency like Middle sex few know the candidates by sight

Irving felt it his duty to assume an

attitude of importance. He folded his arms, pressed his hat over his brows and was every inch the baffled politician-defeated, sad, yet sternly resigned to his fate. In this character he was so impressive that the crowd came to the conclusion that he was the de-

feated candidate.

"So woebegone and so solemnly digni fled did he look that they were overcome with emotion, and to show their sympathy they took the horses out of the carriage and dragged it back to London. When they left us I got up to thank them, but this did not dispel the illusion. 'Poor fellow.' I heard them say as they looked at Irving, 'his feelings are too much for bim!' and they patted him on the back, shook hands with him and thanked him."

Had a Sixth Sense.

A medical correspondent has had brought to his notice the remarkable case of a woman possessing an extraordinary sixth sense in regard to spiders. She could, the writer records, detect the presence of a spider in any room she happened to be living in without having seen the insect or without having any reason to suppose that it was there. The discovery was accompanied by violent sickness, malaise and even debility, but all this passed away on the spider being caught and removed from the room.-London

The Largest Earth Dam.

A notable engineering structure in the drainage basin of the Missouri river is the Belle Fourche dam, erected across the river of the same name in South Dakota by the government to impound water for irrigation. This dam is an earth embankment 155 fee: high and one and one-fifth miles long. containing 1,600,000 cubic yards of earth fill. This is the largest earth dam in existence.-Argonaut.

His Standard.

Young Bride (to waiter)-Waiter, my husband has been here very frequently lately. I hope he's all right, eh? Waiter-Oh, yes; he never has more than three glasses of beer. If he were not happy he'd surely drink six .- Fliegende Blatter.

Friendship is a strong and habitual inclination of two persons to promote the good and happiness of each other .-Meredith.

Shiloh 🕾

ly that the people ran.

In writing for the Romans he used colorful allusions and the references to wild beasts to touch their intelligence in sympathetic fashion at every stroke. -Philadelphia Bulletin.

Stellar Elements.

The spectroscope shows the lines so far in stellar research of forty-five elements well known here in the earth. Hydrogen exists in all stars in enormous quantities. Iron and a number of other metals likewise are incandescent in the sun, and in all other suns bright enough to send rays into the grating for analysis,

An element named coronium is now seen glowing in the envelopes of the sun, but it has not been discovered here on earth yet. Helium was seen in the sun for a number of years before it was finally discovered in the earth. Stars vary in the character of the rays emitted; therefore all suns are not alike. And the differences indicate differences in their ages .- New York American.

Wanted Information.

At Bellevue hospital many of the orderlies are harmless and willing men known as "self committers." That is, they have had themselves committed to the public institutions while out of employment.

One of these was put in charge of a contagious case for the first time.

"Remember, Clancy," said the doctor, "this case must be isolated."

"All right, sorr," was the reply. "Where will I get the ice?"-New York World.

Flight of Life.

Child, child! No more! As if driven on by unseen spirits the sun steeds of time are running away with the light chariot of our destiny, and for us remains nothing except with high courage to hold fast the reins. And now to the right, now to the left, from a bowlder on one hand or a precipice on the other, to guide the steeds in safety. Whither it goes, who can say? One scarcely remembers whence he came .-From Goethe's "Egmont."

What Worried Him.

"What side are you on in this debate?" asked the constituent.

"I don't like to say," replied the young statesman. "My own opinions don't matter so much, but it worries me to realize that whatever way I vote I'm almost sure to hurt somebody's feelings."

Vain Man's Weakness.

Pity the poor egotist whose vanity has swollen to the point that he thinks he can influence a woman in the matter of dress.

Knowledge and timber shouldn't be much used till they are seasoned,-Oliver Wendell Holmes.

Regularity-

of the bowels is an absolute necessity for good health. Unless the waste matter from the food which collects there is got rid of at least once a day, it decays and poisons the whole body, causing biliousness, indi-gestion and sick headaches. Salts and other harsh mineral purgatives irritate the delicate lining of the bowels. Dr. Morse's Indian Root Pills—entirely vegetable—regulate the bowels effectively without weak-ening, sickening or griping. Use

Dr. Morse's " Best since 1870. Indian Root Pille on the desk as the writer went up to the A spelling class, gave a sensation not to be duplicated in any later years.

The contents, I regret to say, were insignificant, negligible. It is to be boped that the big boy learned more about the art in time. But the mere fact of getting such a note, of having it written to yourself, of forecasting the contents, of having the other girls see you get it, all that in addition to the exciting fear that the teacher might see-once she made a girl read a note out loud!-filled the moment with peculiar emotion -Margaret Lynn in Atlantic Monthly.

A FAMOUS REPLY.

The Cynical Comment Made by Sweden's Greatest Chancellor.

The career of Axel Oxenstjerna is a proud chapter in the history of Sweden In 1611 Oxenstjerna became the chancellor of the Swedish empire, under Gustavus Adolphus, and much of the glory that befell the reign of that remarkable monarch was due to "the masterly diplomatic ability, great courage, resource and moderation" of his orime minister.

For in the days of Oxenstierna Sweden was one of the "powers" of Europe, and the Swedish dominion for a time extended over Prussian territory. During the entire period of the Thirty Years' war in Europe, Sweden, through the instrumentality of her "mighty man in peace," maintained an enviable place in the council of nations.

And when in 1648 negotiations for a general continental agreement began at Osnabruck the Swedish chancellor appointed his own son, Johan, as the Swedish representative. The son expressed his distrust of his ability to properly serve his country in so responsible a capacity. To this natural diffidence of youth the father made his famous reply:

"Dost thou not know, my son, with how little wisdom the world is gov-

Jefferson and the Lawyers.

In the "Autobiography of Jefferson"

is this passage:

"I served with General Washington in the legislature of Virginia before the Revolution," wrote Jefferson, "and during it with Dr. Franklin in congress. I never heard either of them speak ten minutes at a time, nor to any but the main point which was to decide the question. They laid their shoulders to the great points, knowing that the little ones would follow of themselves. If the present congress errs in too much talking, how can it be otherwise in a body to which the people send 150 lawyers, whose trade it is to question everything, yield nothing, talk by the hour? That 150 lawyers should do business together ought not to be ex-

Language of Music.

The members of a church choir not a nundred miles from Glasgow Cross are responsible for the following: "Allegro moderato-a famous Italian composer who wrote a large number of pieces; poco crescendo-a little swell; locoat express speed (derived from locomotive); staccato-stick to the notes; presto-turn over; interval-a short pause for refreshments; con due peiale-with cold feet!" Not so long ago, adds the Glasgow News, we heard a young lady in raptures over what she called Chopin's "Because," and it took us some time to discover that she meant Chopin's "Berceuse,"

Farm Laborers Required for 1914 Crop -Western Canada.

Within the past few days representatives of the Depurtments of Agricul-ture if the Provinces of Manitoba, Sa-katchewan a ri Alberta, together with the general passenger agents, of the western line, of the Canadian Northern, Canadian Pacific and Grand Trunk Pacific Railways, held a meeting at Winnipeg, at which agreement was reached regarding the number of laborers required this year for the harvest, the method of their distribution, and the points to which they should be forwarded. It has been decided that farm latorers will not be distributed to points west of Moose Jaw, Sask., Kerrobert, Sask., and Macklin, Sask., nor south of Wetaskiwiu, Altu, on the Canadian Pacific Railway, nor south of Munson, on the Canadian Northern Railway, and Three Hills on the Grand Trunk Railway. The railways propose to run four farm laborer's excursions to Western Canada, starting about Aug-ust 7th. The first two will be distributed to points in Manitoba only, and the last two to points in the Prairie Provinces. The concensus of opinion at the meeting was that the crops were particularly good throughout the northern section of Manitoba, Saskatchewan and Alberta, or in other words, the section served by the main line and branches of the Canadian Northern Railway, which include the wall known. well known Saskatchewan Valley, Shelbrook, Swan River, Melford, Battleford, Prince Albert and the Athabasca Districts. The present indications are that about 20,000 farm laborers will be required.

WORRY CAN KILL.

Science Proves That Fretting 1 quently Costa Life.

We have often heard that wo can kill even the nine-lived cat, we have only half believed it, until now we have had no scien proof that it was so.

Medical science has recently firmed the fact and explained l worry commits its murders. It reached the conclusion that in m instances of what has been regar lunacy, and from which the vic finally dies, the case has simply b one of acute worry. Instead of person dying of mental breakdown has worried himself to death.

Worry medical science now defi as the dominance of one idea, usua that of fear. There is a fear of so existing condition or dread of w may happen. The idea crowds others from the mind, or pern them only the feeblest and occasio activity. The most terrible tyras is the tyranny of an idea.

This one idea pounds hammer-l upon one set of brain cells. It of stimulates them, causing an unus flow of flood to those portions an dearth of it to other parts of brain. This would not be serious i happened only now and then, every brain cell should be replent ed by more than the usual flow blood at times to keep it properly and nourished.

But a constant overfeeding of th cells causes a congestion there. cells become more and more diste ed. The worry grows more and m acute. The pounding of the blo against the sides of the cell acqui a hammer-like violence. The sides the cells wear thin. A cell bur There is a so-called "clot on brain." Death follows.

The cure of the worry that kills prevention. Refuse to worry. Do yo best, and, having done this, decline positively to fret about the results you would decline to drink a drau of poison. Worry comes as an oc sional visitant to everyone, but as shut our doors to unwelcome visite so we close the portals against entrance of worry. Admitted, ceases to become a visitor—it is habit, and a habit that destroys. T action of worry upon the brain ce is most like the constant dropp of water upon a stone. At first makes not the slightest impressi upon the stone, but in time it we:

it away. The cells of the brain are

more delicate tissue, and the stea

wear and tear of the extra blood st ply in time quickly wears them o

WORRY CAN KILL.

ence Proves That Fretting Frequently Costs Life.

Ve have often heard that worry kill even the nine-lived cat, but have only half believed it, and il now we have had no scientific of that it was so.

dedical science has recently conled the fact and explained how ry commits its murders. It has ched the conclusion that in many ances of what has been regarded unacy, and from which the victim .lly dies, the case has simply been of acute worry. Instead of the son dying of mental breakdown he worried himself to death.

Vorry medical science now defines he dominance of one idea, usually t of fear. There is a fear of some iting condition or dread of what y happen. The idea crowds all ers from the mind, or permits m only the feeblest and occasional The most terrible tyranny he tyranny of an idea.

'his one idea pounds hammer-like n one set of brain cells. It overpulates them, causing an unusual of flood to those portions and a rth of it to other parts of the in. This would not be serious if it pened only now and then, for ry brain cell should be replenishby more than the usual flow of ed at times to keep it properly fed

nourished. ut a constant overfeeding of these s causes a congestion there. s become more and more distend-The worry grows more and more The pounding of the blood inst the sides of the cell acquires ımmer-like violence. The sides of

cells wear thin. A cell bursts. re is a so-called "clot on the n." Death follows.

he cure of the worry that kills is rention. Refuse to worry. Do your and, having done this, decline as tively to fret about the results as would decline to drink a draught oison. Worry comes as an occaal visitant to everyone, but as we our doors to unwelcome visitors, we close the portals against the ance of worry. Admitted, it es to become a visitor—it is a t, and a habit that destroys. The on of worry upon the brain cells nost like the constant dropping vater upon a stone. At first it es not the slightest impression n the stone, but in time it wears way. The cells of the brain are of e delicate tissue, and the steady r and tear of the extra blood supin time quickly wears them out.

DOFFING THE HAT.

It Was Once a Sign of Abject Subservience to a Superior.

We consider a man a gentleman who takes off his hat to a lady. least the act is thought to be gentle-manly polite. The origin of this custom, like so many other customs common among so-called civilized peoples, go back to primitive times.

When a person was made captive his conqueror stripped him of his weapons and clothing and left him without anything he could call his own. The captive was thus made a slave, his lack of clothing being evidence of his subjugation. We need only to look at the sculptures of the Assyrians to see the truth of this fact. And in Isaiah xx. 2-4, we find the following statement: "And the Lord said, like as my servant Isaiah hath walked naked and barefoot three years for a sign, so shall the King of Assyria lead away the Egyptians prisoners and the Ethiopians captives, young and old, naked and barefoot."

The first step then, in tracing the origin of taking off the hat, is the surrender of the clothing among primitive and ancient peoples as a mark of submission. The next step is the uncovering of the body as a mark of reverence. There are all degrees of uncovering, though often only the most valuable parts of the clothing are taken off in the presence of superiors.

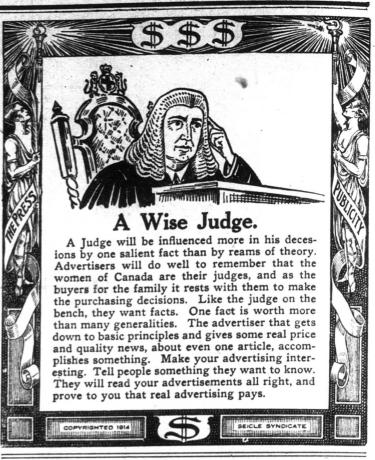

Captain Cook tells us that during his stay at Tabiti two men came on board, and, as a sign of respect, took off the greater part of their clothing and put it on Cook and his friend In Abyssinia, Spencer tells us, it was the custom for inferiors to bare their bodies down to the girdle before superiors. But in the presence of equals only a corner of the tunic was removed so as to bare the shoulder. This baring of the shoulder, especially throughout the Gold Coast, is a custom as common as taking off the hat with us. Uncloaking in Spain is similar in origin. In Africa the men bare their shoulders and doff their caps to superiors,

thus joining two customs in one.

It must be remembered that this act of uncovering the body was ceremonial in nature and used to show reverence to a superior. Then came the use of the ceremonial to propi-tiate the dead. We can see a rem-nant of this most any time. At funerals and in our graveyards men take off their hats on entering churches and before images of Christ and the Madonna.

In times of chivalry men raised their hats to ladies to show rever-ence. But this was only superficial in meaning. A knight would ride down a poor peasant woman carrying a large burden and never think of helping her-least of all would he think of taking off his hat to her. However, if he heard of some beautiful damsel of his own class in the slightest danger, imaginary or real, he would go to her and, hat in hand, kneel and dedicate himself to her

To-day much the same thing occurs. Ordinarily a gay youth forgets to take off his hat to his mother, yet he shows this deference to his "best girl." After all it is only form, and politeness should go deeper than However, the form 'persists, this. and it is of some historical interest to remember that it is a remnant of the primitive stripping of a captive by which process was expressed the fact that he yielded up all he had. Taking off the hat to a wealthy girl means occasionally not only the yielding up of all you have, but the getting of all she has. Ceremony is often nothing but a hard calculation in regard to personal results, espe-

Ceremony is often nothing but a hard calculation in regard to personal results, especially where self-aggrandizement is the ultimate aim of the polished in-

The Rich Turkish Beggar.

Beggars are never suppressed in Turkey. The story is told (and they say it is true) about a lady who by mistake gave a beggar of Constantinople a gold piece. The man had left his post when she returned, but one of his colleagues told her where he "resided." It was a fine house. and at the door was a servant, who politely informed the lady that "my master is dressing. He will be down soon." And then the well groomed beggar, dressed for dinner, appeared and gladly returned gold piece, exclaiming in the meanwhile that such mistakes were highly embarrassing.

The Whole Business.

A very young housekeeper went to market to purchase a spring chicken. After selecting one and inquiring the price she said:

"Isn't three shillings rather high? The poulterer in our road only charged me 2s. 9d, the other day." With the feet on?" asked the

salesman. "No. I believe, now you mention it, the feet were cut off," she repli-

ed, with some hesitation.
"I thought so," said the man at When we sell a fowl here, the stall. ma'am, we sell it feet and all."-

London Telegraph.

"We, the People of England."

Every one has heard of "the three tailors of Tooley street," but it is not generally known that only two of them were actually tailors. The three men were John Grose, tailor, Tooley street; Thomas Satterly, tailor, Weston street, and George Sandham, grocer, Bermondsey street. They were accustomed to meet after business hours at a public house in Tooley street in Southwark to drink beer, smoke their pipes, talk politics and discuss public affairs. During the movement for Catholic emancipation, when Canning was prime minister, these three worthles determined to petition parliament on the subject, and they commenced the document with these words, "We, the people of England!"-London Express.

John Locke.

John Locke, whose "Essay on the Human Understanding" was the first work that attracted attention in England to metaphysical speculation, was born at Wrington, England, Aug. 29, 1632, and died at Oates, England, Oct. 28, 1704. The chief purpose of the essay was to find the original source and scope of human knowledge. The conclusions he arrived at in this study were that there is no such thing as "innate idea; that the human mind is as a sheet of white paper prepared to be written upon; that the knowledge thereon written is supplied by experience and that sensation and reflection are the two sources of all our ideas." He made the first sketch when he was thirty-eight years of age and finished it seventeen years later. The book was bitterly attacked.

FACED FOUR LIONS.

Coolness and Daring of a Plucky Kaffir Herdboy.

Four lions attacked a berd of cattle on a farm at Romsey, South Africa, says the Rhodesia Herald. The herdboy was standing on an ant heap examining a pair of boots he had got the day previous, when he heard a low growl near him. On looking up he saw that three lions had got hold of three cows, while another lion stood looking on.

The boy pulled off his boots and threw them at the nearest lion, and then made a rush for them with a stick, shouting at the same time at the top of his voice to another herdboy to bring a gun.

In the meantime two lions had got A Useful Vegetable That May Be Pretheir cows down, but, nothing daunted, the Kafir made a rush for them, and the lions moved away from their prey. The boy then rounded up his cattle (he had 108 head), and while he was doing so had to chase the lions away several times. When he was at one side the lions would try to catch the cattle on the other. However, he brought all his cattle safely home. though one of the cows afterward died. the claw of a lion having penetrated her lung.

For cool daring it would be hard to beat the chasing of four lions single handed and with no weapons except a pair of boots and a stick.

LEARNING HOW TO UNLEARN.

Modern Scientists Harking Back to Thales of Miletus

When we were young and knew without doubt that the molecule was composed of two or three ultimate parts. called atoms, we listened complacently to the statement that "science progresses in a straight line, philosophy around in a circle, or at best along a belical spiral." Now that we are older and believe that the simplest atom has nearly 1,800 parts, we find that perhaps the belix is expressive of science as well, observes the editor of the En gineering and Mining Journal.

We believe, with the alchemists, that the so called elements are fundamen tally the same. Whether we will trans

mute one to another remains to be seen; we follow the alchemists in attempting it.

Were one of the Greek philosophers, Thales of Miletius, for instance, to stroll into a modern assembly of physicists and chemists, the language would be more troublesome than the ideas. He would hear the physical chemist remarking cheerfully that there is no matter, for that which we call matter is only energy, and Thales would remark, "Plagiarist." The disciples of relativity, the ultra modern physicists, would tell him that space and time are one, and Thales would sigh to think of his boyish debates.

COOKING LETTUCE.

pared in Many Ways.

The succulent lettuce is a vegetable of much adaptability. Of course as the basis of a salad it always has been and always will be invaluable. As a garnish for cold meats it will always stand first among vegetable decorations, but it also has many other possibilities.

Take several heads of heavy lettuce and boil them in gently simmering water. When done place in lengths on hot plates, pour over a brown sauce to which has been added tomato, and the result is a most delicate vegetable.

Another way is to cut out a little of the heart of the lettuce, placing in the hollow thus made a tomato. Cook until tender and then serve with a brown gravy.

A very pretty way to serve lettuce is to take a perfect head and curl back the leaves. Place under the lower leaves cucumbers cut in slices, under the next leaves slices of tomato and nearer the top a few nuts finely ground. Serve with salad dressing.

INSECT FREAKS.

Bugs That Carry Their Own Wireless Telegraphy.

The insect world includes thousands of little creatures which are puzzles no naturalists has yet been able to solve. The reason why they are so puzzling is the fact that attached to their bodies they have strange appendages which science can see no use.

One of the queerest of these puzzling bugs is the South American plant fly, which goes through life with strange flag-like expansions on each of its shins. What purpose, if any, these serve science has thus far been unable to find out. The closest observation fails to reveal that they are anything but a serious hindrance

to the bug in getting around.

Another insect "freak" is the brentlid beetle, found in South America. It has an extraordinary long and narrow head—longer, in fact, than all the rest of its body.

The male adler fly, from Central America, is equipped with enormous mandibles, which are of absolutely no assistance in feeding.

The blood-sucking sprout fly, which makes parts of Nubia uninhabitable for three months of the year, has a particularly long srout. Science wonders why for it is no more bloodthirsty than some of its relatives which are short-nosed. The "feelers" of the Scottish tim-

berman beetle stretch out four times the length of its body, for no purpose whatever that science has been able to discover.

The most plausible explanation yet offered for these monstrous noses, long "feelers" and other anatomical monstrosities is that they constitute the apparatus by which these insects communicate with one another, much as human beings do by wireless

The long "feeders" of the timberman beetle may well be the wireless mast through which it picks up at-mospheric vibrations set in motion by similar "feelers" on other beetles.

Won In Spite of His Lawyer.

A once well-known attorney used to tell a good story on himself. He had been retained to defend a counterfeiter and advised him to plead guilty. His client did so, and as there was in the mind of the court a fixed idea that if a prisoner pleads guilty he does so because he has no attorney the judge asked him why he made that plea.

"Because my lawyer told me to." "Did he give you any reason for

FATE OF THE RESOLUTE.

British Economy and the End of Franklin's Exploring Ship.

The story of how the brave little exploring ship the Resolute was found by an American vessel in Davis strait after a thousand mile cruise from Melville island without a soul on board is easily the most captivating in the history of arctic exploration. The Resolute, locked in the ice, was abandoned on May 15, 1854, sorely against the will of her captain by advice of the leader of the Belcher-Franklin expedition. The reappearance of the vessel on Sept. 17 caused a great sensation, and the United States brought the vessel with great ceremony to Cowes in order to present it to the queen of England.

The queen, the prince consort and others of the royal family then at Osborne House inspected the vessel, which had been carefully repaired and all the original furniture retained in position down to the smallest trinkets. The American skipper traced before her majesty the thousand mile course of the vessel and expressed his belief that Sir John Franklin was still alive, living among the Eskimos.

After many banquets the actual transfer of the vessel took place on Dec. 30, 1856, when the American flag was replaced by the British. And now comes the tragedy. The admiralty had no sooner come into the possession of the vessel than it proceeded to break it up on the good old principle of public economy!-London Chronicle.

A TRAP FOR MARINERS.

Salmadina Bank, Off Colombia's Coast, Is a Perilous Shoal.

One of the most dangerous places for navigation is the Salmadina bank, which lies just outside the harbor of Cartagena, Colombia, Many vessels have come to grief on the treacherous sands of Salmadina in the past, and because of the impossibility of keeping buoys on it the shoal is a constant menace to ships plying those waters.

This dangerous bank is about four miles long and two miles wide. There is scarcely more than twelve feet of water over it at any time. The sea is usually smooth in that part of the Caribbean, and unless there is ground swell enough to cause waves to break on the reef there is nothing to warn the navigator that he is approaching this shallow spot. He may have his lead going and get plenty of water one minute and be bang up on the shoal the next.

The lighthouse people will probably never be able to put buoys on Salmadina that will stay there. They are invariably carried away in the terrific hurricanes that periodically sweep these waters. So it seems as if Salmadina was a bad spot put there for the permanent worriment of shipmasters. -New York Sun.

CHILE'S CITY OF HILLS.

Valparaiso Is One of the World's Architectural Curiosities.

The city of Valparaiso is built upon nineteen hills like Rome upon her seven. It is one of the most curious cities in the world. Its hills rise from three to eleven hundred feet high, and the city is ranged upon them, tier above tier, in sections that are separated/by deep gullies, through many of which flow lively little rivers. Winding streets climb, as in Lisbon,

How the Falconer Told It.

I found my eyes jowking on the cadge, but she awoke, mantled and roused a little, after which I let her bowse. Hooded, with jesses, leach and bells in perfect order, I took her on the fist and so to the fields. It was evident that she was in yarak, for her sails, mails and train ruffled eagerly, and her petty singles spasmodically contracted so that her talons gripped the glove hard. A rook appeared and I few her at it. It was too far off and escaped, but it was a marvel to see lady wait on, discover another quarry. chase it, throwing up cleverly, and finally bind to it with a lightning stoop. She was depluming it when I was able to make in easily.-Outing Magazine.

CHILE'S CITY OF HILLS.

Valparaiso Is One of the World's Architectural Curiosities

The city of Valparaiso is built upon nineteen hills like Rome upon her seven. It is one of the most curious cities in the world. Its hills rise from three to eleven hundred feet high, and the city is ranged upon them, tier above tier, in sections that are separated by deep gullies, through many of which flow lively little rivers. Winding streets climb, as in Lisbon, b: the aid of stairways, lifts and inclined tramways up from the docks to the hilltops. The houses are mcdern, but not notable architecturally Those of the wealthier people are mansions and have fine grounds, though many of the aristocratic families spend most of their time at Santiago or at summer villas farther south.

Everything in Valparaiso i: dis-tinctly a part of the twentieth century restless business world. traveler finds as many comforts though far less of luxury than at Buenos Aires, which lies 1,200 miles away at the opposite end of the great Transandine Railroad.

The poorer people live on the lower levels of the city not far from the narrow strip which contains the shipping offices, shops and banks. They are industrious, steady workers, and gave me the impression of a virile, worthy, thrifty folk.

The tramway system was put in by Germans and is still owned by a German syndicate. The cars are double-decked, and some genius divided them into first and second class compartments, the first-class passengers riding inside and the second class climbing up by a winding narrow staircase to seats on the top. First class fare is 5 cents, second class half fare is 21/2 cents. And what Anglo-Saxon would not prefer the fine sight seeing seats on top? Most of the conductors are women. During the campaign against Peru and Bolivia it was necessary to have women for car conductors, the men being away at the war. The women proved to be more efficient and honest than the men, and they have been continued ever since.

Immensities and Eternities.

Herschel in his day revealed the amensities and the eternities as immensities and the they had never been revealed before, and to us of the present day the universe is much greater than to Herschel and his contemporaries. Five hundred millions of stars are known-500,000,000 flaming suns whirling through space and carrying along with them in all probability systems of planets and satellites. There are stars at all stages of development, from the nebulous mass at the beginning of its star life to the dim red variables flickering as they die out into the darkness. This is die out into the darkness. This is the universe, "grand, splendid and sublime," which Flammarion reveals to his readers.-London Everyman.

MONTREAL GRAIN MARKET.

MONTREAL, Aug. 3.—There was quite an active demand from local and outside MONTREAL, Aug. 3.—There was quite an active demand from local and outside buyers for coarse grains and in consequence the tone of the market for oats today was strong with prices ½c to 1c per bushel higher. Brisk business was done in car lots. The flour market was strong and prices for spring wheat grades were advanced 30c per barrel under an active demand from local and country buyers for car lots, but millers will not sell anything except for delivery within 10 days. All lines of mill feed except bran were strong at an advance of \$1 per ton with a good demand. The butter market continues strong and prices are steadily working upward under a good demand for local account and for shipment to the west. At the auction sale today finest creamery sold at 25c. Cheese was quiet, but firm. Eggs active and firm. Dressed hogs 25c per 100 pounds higher. Exports cheese for the week \$7,152 boxes compared with 71,409 for the corresponding week last year. Total shipments of cheese since May 1 to date were 590,633, against 640,367 boxes for the same period last year.

CATTLE MARKETS

UNION STOCK YARDS.

TORONTO, Aug. 3.—Receipts of live stock at the Union Yards were 139 cars, comprising 2862 cattle, 701 hogs, 726 sheep and lambs and 377 calves.

Butchers' Cattle.

Choice steers sold at \$8.50 to \$8.80, and one extra choice load brought \$9: this is 10c higher than at any previous mark-th. Loads of good at \$8.25 to \$8.50: medium to good at \$7.50 to \$8.15: common : medium at \$7.25 to \$8.50: inferior, light steers and helfers at \$6.25 to \$7; choice cows at \$6.75 to \$7; good cows at \$6.25 to \$6.50; medium cows at \$5.50 to \$6.50: medium at \$4.75 to \$5.25; canners at \$3 to \$3.75; bulls at \$5. to \$7.25.

Stockers and Feeders.

Steers, 800 to 950 lbs, are worth \$7 to \$7.25: steers, 700 to 800 lbs, \$6.50 to \$7; stockers, \$5.50 to \$6.25.

Milkers and Springers.

Receipts of milkers and springers were not large and prices were again reported as ranging from \$45 to \$95 each. Butchers' Cattle.

Veal Calves. Veal Calves.

Receipts were very light, and prices very firm. Choice calves, \$10 to \$11; good calves. \$9 to \$10; medium, \$8 to \$8.50; common at \$7 to \$8; inferior eastern calves, \$5 to \$6.50.

Sheep and Lambs.

Receipts were moderate and prices again firm. Sheep, light, sold at \$6 to \$6.25; heavy owes and rays at

Receipts were moderate and process again firm. Sheep, light, sold at \$6 to \$6.25; heavy ewes and rains at \$4 to \$4.50; lamos at \$9 to \$10 for good to choice, and \$7.50 to \$8 for culls.

Receipts were light, but prices were not any higher, and quoted at \$9 to \$9.20 fed and watered and \$9.45 weighed off cars, and \$8.75 to \$8.80 f.o.b. cars.

MONTREAL LIVE STOCK.

MONTREAL, Aug. 3 .- At the Montreal Stock Yards west end market receipts of Stock lards west end market receipts of live stock for the week ending Aug. 1 were 1700 cattle, 2200 sheep and lambs, 2450 hogs and 1000 calves. The supply on the market for sale this morning was 1400 cattle, 1350 sheep and lambs, 1100

hogs and 700 calves.

Owing to the offerings of cattle showing an increase of over 500 head, compared with this day week, the trade opened up very quiet this morning on account of the fact that drovers were firm in their views and buyers showed a disposition to hold off and await developments, which action on their part, however, did not seem to discourage sellers to any great extent, as they were well aware of the fact that all the stock would be wanted after the short runs of the past two weeks, and in consequence the demand improved later in the day and a fairly active trade was done. The feeling was not so strong as a week ago, but prices were maintained in most cases. The demand for stock for shipment to the Buffalo market was fair, and several carloads were purchased. The supply of good to choice steers was more plentiful, and sales of several cars were made as high as \$9, while carloads of good steers changed hands at \$3.25, and mixed lots of common stock at \$5.50 to \$6 per 100 pounds. The demand for canning stock was fair, and sales of cows were made at \$4 to \$4.25, and bulls at \$5 to \$5.25 per 100 pounds.

The strength which has characterized

The strength which has characterized The strength which has characterized weeks continued the main feature of the situation. Prices today scored a further advance of 25c to 35c per 100 pounds, which is attributed to the strong upward tendency of prices in the Toronto market the somewhat limited supply coming from there, and the keen enquiry from packers. The trade was active, with sales of selected lots at \$9.55 to \$10; cows at \$7.85 to \$8, and stags at \$4.90 to \$5 per 100 pounds, weighed off cars.

The feature of the small-meat market

feature of the small-meat market The reature of the small-meat market was the stronger feeling in sheep, and prices advanced 50c to 75c per 100 pounds owing to the good demand for supplies and the smaller offerings for the season. In fact, some of the leading butchers stated that, even at the higher prices, they could not fill their requirements, Sales of ewe sheep were made at \$5.50 to \$6 per 100 pounds. The tone of the market for lambs was also stronger for choice stock ket for lambs was also stronger for choice stock, and lots of Ontario lambs sold at \$6 to \$7, and Quebec at \$4.25 to \$4.50 each. The trade in calves was active at firm prices.

CHICAGO LIVE STOCK.

CHICAGO, Aug. 3.—Cattle—Reccipts 13,000. Market weak. Beeves, \$7.10 to \$9.99; Texas steers, \$6.40 to \$7.75; stockers and feeders, \$5.30 to \$8; cows and heters, \$7.30 to \$8.40; calves, \$7.50 to \$11.25

\$11.25. Hogs—Receipts 22.000. Market lower. Light, \$8.25 to \$8.75; mixed, \$7.85 to \$8.55; neavy, \$7.70 to \$8.40; rough, \$7.70 to \$7.50 pigs, \$7 to \$8.60; bulk of sales, \$8.20 to

\$8.25. Sheep—Receipts 10,000. Market steady. Native, \$5.15. to \$5.90; yearlings, \$5.60 to \$6.60; lambs, native, \$6 to \$8.05.

French Socialists for War.

P RIS. Aug. 4 .- At a mass meeting of Socialists held yesterday, it was unanimcusly resolved that they should do their duty to defend their country and to attempt no reprisals fo: the killing by Raoul Villain last 1 ricky of Jean Jaures, the Socialist leader in the Chamber of Deputies.

French Indo-China.

French Indo-China consists of the colony of Cochin China, a French possession, the five protectorates of Tonkin, Anam, Cambodia, Loas and Luang Probang, the territory around Battambang, which was ceded by Siam in 1907 and which is administered by the Indo-China Government as a quasi protectorate, and the territory of Quantcheoua, which is leased from China.

What They Cut Out.

"I understand you had to undergo a surgical operation?'

"Yep, some operation."

"Doctors cut anything out?" "Yep, cut out the auto I had plan-ned to get."

Had Been Stung.

The teacher, who was giving the primary class a nature talk, inquired: "Johnnie, how does a bee sting?" Johnnie, a graduate from the school of experience, replied with emphasis, Munchausen II. Unlucky.

Who was the original Munchausen that told the delightful "stretchers?" Raspe is commonly supposed to have founded his hero upon Hieronymus Karl Friedrich von Munchausen, who had fought with the Russians against the Turks and died in 1797. But the Rev. S. Baring-Gould has told the story of a swindler who appeared at Halberstadt in 1702 giving out his name as Baron Karl Friedrich Munchausen. He married a wealthy lady there and told the most astonishing yarns of his travels and adventures. The rest of his career was short. In June, 1763, he murdered his wife, and in August he was executed.— London Chronicle.

Risky Revenge.

Paganini, the wonderful violinist, had a narrow escape at Ferrara from a violent death. Enraged by some hissing from the pit, he resolved to avenge the insult and at the close of his program informed the audience that he would imitate the language of various animals. After having rendered the note of different birds, the mewing of a cat and the barking of a dog he advanced to the footlights and, saying, "This is for those who hissed!" imitated the braying of an ass. At this the occupants of the pit rushed on to the stage and would probably have killed their calumniator had he not hastily retreated.

The Voice of Cash.

Apropos of a young girl's rich marriage an official said:

"Our girls don't marry disadvantageously as often as our boys do. In the whirl of love the female doesn't seem to get quite as dizzy

as the male does.

"A pretty girl told me the other day that she was engaged to a very rich landowner.

"'Well, Well,' said I. 'And here we all thought you'd marry the elo-quent young preacher who took you about so much last summer.

"The girl smiled. "'Deeds speak louder than words," she said.

Cheap Wives.

Among the Ainus the price of a wife is a bear ham. The Kaffir price varies from four to eight oxen. In Ugunda a wife can be obtained for a score of cartridges. The Australian black obtains his helpmate for her weight in butter, and in Turkestan the Tartars can buy as many wives as they please for a box of matches

Blown Window Glass.

Window glass is blown in the shape of long cylinders, which are cut open along one side and then placed on a stone in a hot furnace, where they gradually collapse and flatten out into a big sheet of glass. Often the glass breaks during this process, or even explodes, forming thousands of pieces, which shoot in all directions.

A Tangled Web

BY MRS. ALEXANDER

Author of "Beaton's Bargain," "His Perfect Tru.t," "By Another Name," "Her Hea t's Idol." "Half a Truth." "H's Rival."

"I have done my best to carry out s," wrote Shirley to Mrs. Ruthven, "and your directions, his suzerain. have even arrived at the distinction of being admitted to the drawing-room of Miss L'Estrange at after-noon tea-time. This enables me to assure you that Marsden almost lives in what you term the 'shabby lodgings' of his relatives. I have not met him there certainly; but I trace that he has always been there last night, and is expected this evening. Evesleigh, I find, too, is to be let for a term of years—five. I Old Shepherd, of Calcuttayou remember the firm, desperately rich people-is looking for a countryplace, and it has been offered to his solicitor. It seems to me that this intentions widely different indicates from anything you anticipated, and points more to a marriage for love, than one for, let us say money and love. I have met Marsden more than once lounging in Pall Mall and Regent street as if he had nothing on earth to do, which certainly does not look like the urgent business he asserted called him to town. However, no doubt have information you. which may throw a totally different light on these ambiguous proceedings. I can only give you the result of my observations. Take it at what it is worth."

This letter was the last pebble on the cairn of hopes and fears, desires, doubts, and silent, stinging anger which had been gradually accumulating over the bright anticipations of a few months ago, a continued state of agitation and disappointment had strained endurance beyond the utmost, and the passionate, selfwilled woman gave way under it. cold, caught during a long drive with Lord Dorrington in the east wind, obliged Mrs. Ruthven to keep her room. After a day or two of anxious attendance on the part of the local doctor, high fever set in, and it was evident that Mrs. Ruthven was dangerow ly ill. A great physician and a couple of trained nurses were summoned from London, all the pomp and circumstances of serious sickness were established in Dorrington's pleasent house, and for the time sporting men and dancing

women knew it no more.

CHAPTER XI.

It was some little time before the evil tidings reached Mrs. L'Estrange Nora, as their cerrespondence with Lady Dorrington was not frequent, and she was too much taken up, and too angry with him, to continue her diurnal letters to har brother

Meanwhile Nora and her stepmother went on the even tenor of

Mrs. L'Estrange had gone to Norwood to luncheon with an old lady a distant cousin of her mother, who had only remembered her existence after she had made what was considered a good marriage, and had more than once invited her. Mrs. L'Estrange always found it hard to say

given your father the keenest pieas-ure." Nora was silent "Did Nora was silent. reject him?" as asked L'Estrange.

"He would not accept rejection said Nora, with a grave smile. said I must hear him; that I must marry him; he seemed rather angry excited, but we parted friends. I promised to think of all he had said, and speak to you, who would be his friend he was sure. am astonished he should care for me so much! He has seen such quantities of charming, beautiful people-but he does! Oh! Helen. He is wonderfully fond of me! I could hear it in his voice. I am very ungrateful. I wish, he were not. I am afraid even if I were to marry him he would be disappointed to find that I could not love him enough. It is-I mean it must be-so wretched not to re-

ceive as much as one gives."
"My dear, you could not fail to love him heartily! You are perfectly heart-whole, and yours is a kindly nature, not likely to harden itself against the tenderness of a

true lover.

"No; perhaps not. I wish I did love him. How happy and lighthearted I should be! Now I am uncertain and miserable. I am so impatient, Helen! I can not rest if I muss get light and am unhappy. I must get light and freedom, or I should beat myself to pieces against my prison bars! You are ever so much braver and nobl-

er."
"You have never come in contact with a real necessity, Nora. You can not conceive how inexorably submission is forced upon one sometimes.

There was a short pause.

"I should be glad, I confess," resumed Mrs. L'Estrange, "10 see you well and happily married. You would, I am sure, be always a kind sister to my poor little Bea; as to myself it is not impossible that I mayshe stopped.

"Certainly not; why should not?" put in Nora, eagerly. are young and fair enough to marry

some good, delightful person."
"My dear Nora!" interrupting "What can have suggested so absurd an idea? I was about to touch on a very different topic, but I will not now. Tell me, did Mr Marsden say he would come again?"
"Yes—no. I am not sure what he

said. But I think he will most prob-

Well; we can say no more at present. I will go and change my dress I trust you will be wise, and not reject such an offer for a whim.

"I only want to do what is right," cried Nora, standing up, and letting her clasped hands fall to the length of her arms. "I do wish I loved Clifford, as he deserves me to love him; but-it is very odd-1 don't think I like him as well as I did yesterday. I used to be quite glad see him-and now I rather dread his coming."

That is natural enough, . Nora. There will be a little awkwardness in meeting him at first. I do not quite understand your indifference to veyed the idea that he was really glad to help any one. His detestation of everthing unpleasant or painful gave him an air of kindness, that imposed even on himself.

Yes, if Nora would consent, Bea' future was secure, and why should she not? A better, or indeed a happier, marriage could not be found. Why Nora was not already in love with her suitor, Mrs. L'Estrange could not understand, and set it down to one of the inscrutable mysteries of a young undeveloped na-

was thoughtful, the evening passed almost in silence; occasionally each spoke a few words, and then fell into a fit of musing. The spell, however, was broken by the entrance of the servant with a note for Mrs. L'Estrange.

'The messenger waits, 'm."

"I will ring in a minute or two," Mrs. L'Estrange, opening the envelope.

"It is from Mr. Marsden, Nora," she exclaimed. "He wants to see me alone to-morrow morning."

"I suppose"-smiling-"he wants to rcure my vote and interest.

"They are his already." A pause. "What shall I say, Nora?" "Whatever you choose.

"Then I shall see him."

She rose, went to the writingtable, and penned a few lines, and sent them to Marsden's messenger.

"I imagine that Mr. Marsden will not be easily turned from his purpose. And I hope, Nora, you will not too thoughtlessly refuse so sincere and disinterested a lover.'

"Oh! I know all that can be urged in his favor," said Nora rather impatiently; "and he is very nice-only -I think I should like to be Nora L'Estrange for some time longer. have seen so little. How could I manage a great establishment like Evesleigh House? I am half afraid of that awful housekeeper. And the squire himself likes everything to be so perfect-so elegant-he might regret his own haste in wanting marry such a half-fledged creature as

"My dear Nora! this humility is a new development!"

"I know what I am fit for, and I am not humble, but I do not want to attempt what is likely to be too much for me. There, don't let us talk about Clifford any more at least till you have seen him to-mor-

"Promise me not to refuse him, without due reflection.

"No. I am too undecided to that. But it is rather awful to think that, having once said 'yes,' one can not unsay it."

Mrs. L'Estrange need scarcely have recommended Nora to reflect on Marsden's offer. She was haunted by the recollection of his words, his voice, his eyes. It is true that he kept himself well in hand, and kept back many a passionate expression that rushed to his lips. Nevertheless, he had impressed Nora deeply with the conviction that she was very essential to him. It rather weighed her down with a vague sense of alarm. What was she to do with this tremendous gift of love?—so strong that his voice trembled in spite of his efforts to be steady, when he described it, and his heart throbbed fast and hard when he pressed her hand for a moment against it. Ought she to condemn one who was so tenderly attached to her to suffer the pangs of disappointment and rejection, because she had a morbid fancy for another who did not care for her? And with the thought came a suggestion that sent thrills of pain quivering through her veins. Had the same words and

"Very well. I shall be guided to you, but I can't stand this unce tainty long. Why does she not lil me? for she doesn't."

'It is impossible to say; she is no

a commonplace girl."
"Thank you for the implied con

"You have caught me up too soo

Will you write what I have sugges ed, or shall I speak to Nora?"
"I-will write," he said, and spee ily traced a few lines. "There," I continued, handing the note to Mr L'Estrange, "I am very grateful for your help, and believe me, if I b come your step-son-in-law, I will ca for your inter?sts, and those of n little friend, Bea, as if they were n

own."
"You are very good," said Mr L'Estrange, softly.
"Now," continued Marsden, "who

shall we do? It is an awful time London; I almost wish I had no There is shooting, come up. hunting, or something to be done the country. Have you been Windsor? It is a tolerably fine da Let us go down and lunch there, ar walk about after? Just settle with Nora."

"Very well," said Mrs. L'Estrang

and left the room.

She was some little time absen during which Marsden walked to an fro, picked up and put down bool and papers which lay about, and o casionally looked at the clock. I was impatient, but not uneasy; did not doubt his ultimate succes and was not altogether displease with Nora's hesitation. It was the sense of difficulty which was h crowning charm.

He had seen many lovelier and mo fascinating women; but none had e er charmed and vanquished him this unworldly, natural young cou

Here Mrs. L'Estrange returned, a handed a little twisted note, whi he eagerly opened, and read: "Ye are very kind and considerate, I a cept your suggestion." This wsimply signed "Nors."

"I think you ought to be content said Mrs. L'Estrange smiling.

"I am-and our expedition t

We will be ready to accompan you in an hour. Nora made no o jection.

The meeting, under such trying ci cumstances, was less awkward the Nora experted. She could not be admiring Marsden's tact and co self-possession. If anything, he wa more attentive to Mrs. L'Estran

with Lady Dorrington was not quent, and she was too much taken up, and too angry with him, to continue her diurnal letters to har brother.

Meanwhile Nora and her stepmother went on the even tenor of

Mrs. L'Estrange had gone to Norwood to luncheon with an old lady. a distant cousin of her mother, who had only remembered her existence after she had made what was considered a good marriage, and had more than once invited her. Mrs. L'Estrange always found it hard to say no, and, somewhat to Nora's indig-nation, had consented; but went as her step-daughter refused alone. to accompany her.

It was dusk when she returned, for her hostess had indulged herself in endless inquiries and fault-finding respecting their mutual relations. L'Estrange was wearied, and longed to see Nora's kind, bright face, describe the peculiarities of her testy kinswoman while enjoying a cup of fresh, warm tea.

Nora was sitting on a foot-stool by the fire-light when her step-mother came in, and the little tea-table was drawn near the hearth, the tea-pot simmering under its cozy, a plateful of thin bread and butter, temptingly delicate, beside it.

"llow late you are. Helen." cried Nera, starting up and coming over to assist in taking off her cloak. "What has kept you so long?" Something in her tone struck Mrs. L'Estrange; it was not impatience exactly, it was a sort of subdued excitement.

'It was not the charms of hostess, nor the delights of my visit, I assure you," and she proceeded to describe the bitterness of he talner with much quiet drollery, the bitterness of her enter-

"You don't want the lamp yet?" she tasked, after laughing at her step-mother's account.
nice to sit by the fire." "It is

"It is," said Mrs. L'Estrange, and there was a pause; then Nora said

'Helen, Clifford Marsden called

He said something about "Yes.

coming last night.' "But, Helen! He-he-asked r to marry him! I was so amazed!"

Well, Nora, I am surprised, too. though not so amazed as you are. I have seen that he was fond of you, but I did not think he would marry without money. How did you answer him, dear?"

"I scarcely know, except that I

certainly did not say 'yes.'"

"It is curious," said Mrs.
L'Estrange, as if to herself. "I never thought Clifford Marsden would tie himself to any woman, unless for a large money bribe. He knows exactly how you are situated, and I think the better of him! He must love you very much!"

"He says he does, I believe he does!" said Nora, sitting down on her footstool again and clasping her hands round her knee in a thoughtful pose. "In fact, I am half frightened at the idea of his caring so much about me, though that weak and silly. I never thought the squire could be so intensely in earnest about anything. I feel somehow to blame, for, Helen, I am not one

bit in love with him. I told so, and he said he knew it."
"My dear child, you do not k whether you are or not! Clin Clifford Marsden is a man who might teach any woman to love him; and why should he not win you? He shows that he is sincerely, disinterestedly attached to you. I must say I am

entirely on his side."
"Are you?" said Nora dreamily.
"I suppose so," She sighed.

"It is a marriage that would have

I trust you will be wise, and not reject such an offer for a whim.

"I only want to do what is right," cried Nora, standing up, and letting her clasped hands fall to length of her arms. "I do wish I loved Clifford, as he deserves me to love him; but-it is very odd-I don't think I like him as well as I did yesterday. I used to be quite glad to see him-and now I rather dread his coming.'

That is natural enough, Nora. ere will be a little awkwardness in meeting him at first. I do not quite understand your indifference to so very attractive a man as Clifford Marsden! 'Tell me-you know I would not intrude on your confidence; I only ask because you are dear to me as my own sister-have you any preferency for some one else to steel your heart?"

"Why! who has ever made love to me?" cried Nora, indignantly, coloring climson as she spoke, "and am I the sort of girl to bestow my heart or fancy when neither are sought?

Pardon me, said Mrs. L'Estrange smiling. "the heart, even in the strongest-minded young ladies, is strangely illogical and unaccount-

"Well, I really am not very silly. Now I have kept you too long. perhaps your dress is damp, and vou know you must not be imprudent. "I know it, but I have been under cover all day."

She took up her cloak and was

leaving the room, when Nora exclaim-

"How selfish I am! I quite for-got to tell you I had a few lines from Lady Dorrington, she says Mrs. Ruthven is seriously ill, with fever, nervous fever, and they are quite uneasy about her."

"Indeed! I am sorry, very sorry.
I never liked Mrs. Ruthven as well
as you do, but I think she looked
dreadfully worried of late."

"Did you, do you think she very much taken with the squire?"
Oh. I don't imagine she cares

seriously for any one, she likes the most distinguished man present, returned Mrs. L'Estrange.

"I should be so very sorry to in-terfere with her. It must be dreadbe cut out if you are really ful to

fond of any one." "Do not distress yourself on that

score; I fancy Mr. Marsden's flirtation with Mrs. Ruthven was of the Lady Dorrington's letter?" very lightest order. Did vou Yes, at once, and begged her to

let us know how the patient going on. Mrs

L'Estrange was fascinated by the idea of Nora's marriage Marsden. She had always liked him. and, living out of the world, had never heard the various reports respecting his wild extravagance, his generally reckless life. Even if she had, she would, like a simple good woman, have fully believed in power of a pure attachment to elevate and reform the most determined rake. Besides, though truly and warmly attached to her stepwarmly attached to her step-daughter, she was keenly alive to the fact that her own precious child was utterly dependent on her half-sister. She never doubted that Nora, if left to herself, would be both just and generous, but if Nora married before attaining her majority, Beatrice would be really dependent on some mere strangec, and men are so strange and hard about money mat-ters. Then a husband's power and influence are so great; the poor lonewidow, though she blushed for herself, earnestly hoped Nora would not marry until she was twenty-oae. If Nora married Marsden, she felt sure he would be kind and generous. He was peculiarly sympathetic. It was this that gave him more than half his attraction. He always corthis tremendous gift of love?—so strong that his voice trembled in spite of his efforts to be steady, when he described it, and his heart throbbed fast and hard when he pressed her hand for a moment against it. Ought she to condemn one who was so tenderly attached to her to suffer the pangs of disappointment and rejection, because she had a morbid fancy for another who did not care for her? And with the thought came a suggestion that sent thrills of pain quivering through her veins. Had the same words and tones and looks been Winton's how Had the same differently she would have responded! Perhaps, by cultivating gratitude to Marsden, and giving herself up his efforts to please and win her, she would succeed in loving him; and then she would make him happy and be happy herself. What a solution of all difficulties that would be! Perhaps it would be the right thing to do. How hard it was to know what was right. Finally, the tears welled up, as she thought with regretful compassion of the strong emotion Marsden had displayed-surely such affection constituted a claim upon any kindly heart! Yet she ardently

of alarm. What was she to do with

wished he had not taken such fancy to her! So, after struggling with contradictory thoughts for half the night, she fell asleep toward morning, with a half-uttered prayer to be directed upon her lips.

Mrs. L'Estrange received Marsden cordially and cheerfully. She did not doubt for a minute that Nora. having recovered her first startled surprise at his unexpected proposal, would marry him willingly, as it was natural she should; and she was anxious he should see how very heartily she was on his side.

"I feel sure I have a friend in you," were almost his first were almost his first words, after he had shaken hands warmly with her, "we were always allies since your first appearance at Brook-

"Yes, Mr. Marsden, you were ways welcome to my husband and to me.

Nora has told you of the I gave her," interrupted Marsden, who was absorbed in his own projects. 'I feel I have been too been abrupt. In short, having been pretty far gone about her nearly ev-er since we met last spring, I fancied must see it, and to be candid, her blindness suggests that she may be preoccupied by some lucklier felthan myself. Am I right?

'You ought to ask her, Mr. Mars-

"And seem a conceited jackanapes by implying that only a previous attachment would have prevented her falling in love with me?"

Mrs. L'Estrange smiled.
"I do not think Nora is disposed fall in love very readily. there was no one for her to fall in love with."

"Some women might fancy Win-

'I do not think Nora did. Indeed, they never seemed to take much to each other, especially of late.'

"Well, Mrs. L'Estrange, you will back me up? I may depend on you?" You may. How did you and Nora part?

"Oh, she was very anxious to get rid of me; I could see that, but I told her I would not take her first 'No, nor her second either! Mrs. L'Es-trange, I am determined that Nora shall be my wife."

"Not against her will?"

"No; that would be too ungallant," returning to his usual light tone; "but with her will."

Take my advice; wait a few days before repeating your offer. Let me tell her you will give her time to think, and, meanwhile, that she must let you come as a friend and kins-

you in an hour. Nora made no of jection." The meeting, under such trying cit

cumstances, was less awkward tha Nora expected. She could not hel admiring Marsden's tact and coc self-possession. If anything, he wa more attentive to Mrs. L'Estrang than to herself. The weather wa fine, the conversation light and an mated. Marsden spoke of Mrs. Ruth ven with much good feeling, and th day was far more agreeable tha Nora anticipated, nor did Narsde leave them without making som plans for the morrow which coul bring them together.

A week passed swift yet slow; fo Nora watched the days, with a dir. sense that she was committing her self deeper and deeper.

The accounts from Chedworth wer worse and better alternatively, and considering his relations with th sufferer, Marsden felt bound to g down to his sister's for a day, a least, to sh Mrs. Ruthven. to show proper interest i

His short absence was of use, fo Nora missed him, and recognize what a charming companion he coul be. There was, in short, not on reasonable reason for refusing to b his wife, and, no doubt, as soon a she had pledged herself to him, othe hopes and new duties would help he to forget a folly she ought to hav surmounted long ago.

A letter from him to Mrs. L'Es trange gave a greatly improved account of Mrs. Ruthven. She has really taken that turn for the bette for which her attendants had so eag erly watched. Marsden himself woul come up by the night train, and se them next day.

"Now be sure you receive him well Nora," said her step-mother, smiling, "I think you have tried him enough."

"If you only knew how hard it is to make up my mind on such a tre mendous 'to be or not to be.' "

"Still, you can not keep Mr. Mars den waiting. It is as tremendous question to him too! Will you writ to Bea while I am out, and give fraulein minute and clear direction to their journey on the 10th You know if she can make a mistak she will. I promised to be with Madame Kennett at half past eleven and it is eleven now. If I miss my appointment I do not know when shall get my dress," and she left th

room. During her brief absence some note and letters by the second post wer brought up; an invitation or two, & hasty letter from Nora's German friend respecting an engagement just offered to her, and another letter with a foreign stamp for Mrs. L'Es trange-Nora felt almost sure it was from Mark Winton.

While she looked, Mrs. L'Estrang returned. Nora took up the lette and handed it to her.

"Ah!" she exclaimed, opening i hastily and glancing through the con tents gravely. Then looking through the window she exclaimed: "The cal is waiting; there, dear, you can read it." Leaving the letter in Nora's

hand she went quickly downstairs. "Dear Mrs. L'Estrange," ran the lines, "I am much obliged for yours but sorry to find Lady Dorrington has so serious a case on her hands I was afraid Mrs. Ruthven would feel the effect of such a shock as sho has had; but after two months it is curious she has not thrown it off I trust she will pull through; she al

Very well. I shall be guided by u, but I can't stand this uncer-inty long. Why does she not like ?? for she doesn't."

'It is impossible to say; she is not

'Thank you for the implied comiment."

You have caught me up too soon.

"You have caught me up too soon.
Il you write what I have suggest, or shall I speak to Nora?"
"I-will write," he said, and speedtraced a few lines. "There," he
ntinued, handing the note to Mrs. ntinued, handing the note to Estrange, "I am very grateful for ur help, and believe me, if I me your step-son-in-law, I will care r your inter?sts, and those of my tle friend, Bea, as if they were my vn.

'You are very good," said Mrs.

Estrange, softly. 'Now,' continued Marsden, "what all we do? It is an awful time in ondon; I almost wish I had not me up. There is shooting, or inting, or something to be done in e country. Have you been to indsor? It is a tolerably fine day. t us go-down and lunch there, and about after? Just settle it th Nora."

'Very well," said Mrs. L'Estrange,

d left the room.
She was some little time absent, ring which Marsden walked to and o, picked up and put down books d papers which lay about, and ocsionally looked at the clock. He is impatient, but not uneasy; he d not doubt his ultimate success, was not altogether displeased th Nora's hesitation. It was the nse of difficulty which was her owning charm.

He had seen many lovelier and more scinating women; but none had evcharmed and vanquished him as is unworldly, natural young cous-

What fair round arms she had! hat a sweet mouth, half sad, half ughty! Would she ever press ndly to his? 'I am-and our expedition to-1y?"

We will be ready to accompany ou in an hour. Nora made no ob-

The meeting, under such trying cirimstances, was less awkward than ora expected. She could not help imiring Marsden's tact and cool If-possession. If anything, he was ways struck me as a tough little wo-

man, in spite of her fragile airs.
"I have been extremely uncertain as to my own plans. I am tempted to start off with my friends back to India next week. On the whole, my long-expected holiday has been a disappointment. However, after mature reflection, I have decided to return to London; whether I stay out the full time of my leave, or cut it short and start at once, will altogether depend on what I find there, I suppose you understand this? Has Bea joined you yet? Perhaps I may have the pleasure of seeing her at the pantomime. If I do, what a jolly pantomime it will be to me!

Remember me to Miss L'Estrange and believe me,

"Yours most sincerely, "MARK WINTON."

"Oh! yes; it is clear enough. Helen, like myself, has hesitated, and he is returning for her final decision. I wonder if she has taken this method of informing me? It is rather well done. Probably my engagement would facilitate matters, and might both live happy ever after! Why not? Helen and Mark Winton deserve it. How constant and true he has been. That is his character, though. What perfect trust one could have in him. How good he will be to his little step-daughter. What a funny jumble of relationships. Shall I be his step-daughter too? No, no; neither in fact or fiction can I ever be anything to him, nor does it matter much. Oh! no, nor could I have any pleasanter, more disin-terested partner for life than Clifford Marsden. I ought to be thankful for so fair a lot. I shall soon grow to love him. I love him already-a little. I wish he would come; I shall not tease him any more. I will be very good-very good-he deserves it. Perhaps, when Helen goes to India, she will leave Beatrice with me, she is too young to go out just now. do hope she will; I shall then have a bit of the old home to cling to. Oh! how happy, how happy the last year has been, till my blind eves were opened. What a foolish, conceited girl I have been. Yes. I will marry Clifford-dear Clifford; he will be very dear to me soon, and then I shall be happy again. liow intolerable unhappiness is. If I could but throw it off!"

. She wiped away the tears which would spring to her eyes; she put away Winton's letter, and setting out her writing things, resolutely fastened her attention on the directions she had promised to send Bea's little Kindergartnerin.

When about half through her task, the door was opened by the clerical-looking master of the house, who solemnly announced "Mr. Marsden.

Nora sprung up with a movement of genuine pleasure.

Marsden was looking better and brighter than when he left. He had more color, his fine blue eyes looked darker than usual, his distinguished figure admirably arrayed his casy grace, his whole style and appearance were fit for an ideal lover

"By Heaven! Nora," he exclaimed with delight, as he clasped her out-stretched hand in both his own.

'you are glad to see me?'
"Yes, very!" returned Nora, with a little nervous laugh, and leaving her hand in his.

He drew her to the light, gazed into her face with longing tenderness, while a slight knitting of the brows showed how intently he tried

to read her thoughts. "My darling!" he said, in a low "there are tears in your eyes? What has grieved you-tell me?

"Oh! nothing. What could I have to cry for? Yet the tears did come,

waltz. I would have done so if death had been the penalty. Then I felt I wanted to carry you away from every one-to be mine-mine alone.

"And why-why do you care for me so much?" cried Nora uneasily; his vehemence displeased her, she

scarce knew why.

"How can I tell?" he returned more calmly. "Some witchery I could neither resist nor explain!" There was a pause, and Nora went to the writing-table, and began to look over her letter. "I wonder look over her letter. what can have detained Helen," she said; "she ought to have returned by this time."

"She has, probably," observed Marsden smiling. "I told the servant to let her know I was here, and

she has perhaps kept away. "Then let me go and find her; she

will be pleased.

"Yes!" interrupted Marsden. "She is a nice, charming creature, and my good friend! but do not seek her yet. I have a thousand things to say. Must you finish that letter?"

Yes, indeed! I shall only be a very few minutes; it is about Bea and her travels; she comes up with fraulein in a few days."

While she wrote, Marsden leaned over a high-backed chair and gazed at her, and then they glided into talk of the future. He was full of pleasant projects, of traveling, of spending a few months at Vienna, of a cruise in the Mediterranean, of everything save residing at sweet

Evesleigh.
"Now I really will look for Helen!" cried Nora, moving toward the door. Marsden interposed he-

tween her and it.

"Once more," he exclaimed, "hefore this heavenly hour is ended, te'! me you will love me—that nothing shall separate us."
"I do promise," said Nora, moved

by a strange feeling of compassion.
"Then give me one unstinted kiss,"

he cried passionately; "I want more than mere words.

"Oh, yes! I will indeed-to-morrow," she said, feeling cariously averse to yield, yet not liking to refuse

"Good God! to-morrow! Was ever such answer given to a love? now-now, or I will think you only mock me!

H caught her in his arms, holding her head against his shouldder, pressed his lips to her, in an intense passionate kiss, while she felt the wild throbbing of his heart against her own; but, long before he was willing to release her, she struggled so vehemently to get free, that he let her go.
"Clifford! Cousin!" she exclaimed,

standing at a little distance, with crimson cheeks and heaving bosom, 'you frighten me!"

'If you loved as I do, Nora! But you will! you will one day come and kiss me freely, voluntarily. Why, Nora! have I offended you so deep-

She made no reply, but burst into tears and fled from the room.

CHAPTER XII.

The days of Mrs. Ruthven's dangerous illness were the worst most distressful Lady Porrington had ever known. She was really anxious about the sufferer, and she was in-finitely annoyed by Marsden's unfeeling indifference. Except for the one hurried visit, he was content with a formal daily bulletin; nor did he seem much concerned if, by any accident, that was delayed. It was disgracefully heartless as an abstract fact, and it would have a fatal effect upon Marsden's chances when it came

to the knowledge of Mrs. Ruthven. What was Clifford thinking of? Had

Corson's "man Corsons Ideal Orchid Talcum Powder -is the most refreshing and pleasant of all tales Its elusive fragrance, coolness and antiseptic qualities have placed it foremost ong talcums and made it the favorite of many users. read her own letters. But still, there was no intention on the part of Marsden, apparently, of coming to congratulations in person. He wrote kindly and cordially, but. in a strictly friendly tone, explaining; that he was busy arranging his somewhat entangled affairs, and the pre-liminaries necessary for letting Evesleig on a lease of several years.

This letter was in itself a severe blow. It was, however, as nothing compared to one received next day from the watchful Captain Shirley. After expressing his delight at hearing of her progress toward recovery, his regret at not being on such terms with Lord and Lady Dorrington that he might venture to run down and see her, he informed his esteemed correspondent he could now assure her that Marsden was positively engaged to Miss L'Estrange. He was with her and her step-mother every day, and all day. Finally he (Shirley) had been in a celebrated jeweler's shop in Bond street, where his attention was caught by an unusually fine ring, the design being two hearts united-one of rubies, the other of diamonds. The shopman said it was, he fancied, an engagement-ring, and made to order. He had scarcely finished examining when Marsden came in, and after exchanging a word or two with him, went to the counter and asked if his order had been executed, whereupon this very ring was handed to him.

The next day Shirley had called on Mrs. L'Estrange, and was admitted, when he saw the identical ring on Miss L'Estrange's left third finger. There was but one inference to be drawn.

When Mrs. Ruthven read these lines she felt as if something snapped in her brain. Her heart beat to suffocation, and her imagination pre-sented her with a confused, broken, shadowy mass of pictures from the

Was this the result of all Marsden's implied tenderness and admiration? Had he blinded her keen eyes, and decayed her sharp observation? He deceived her sharp observation? should pay dear-dear. Clifford felt in some vague way flattered by her tears

Then you have thought of me Can you decide? Will you try to love me, and he my wife

"Yes," she returned quietly and distinctly. "I am sure I shall love you as you deserve. I am growing fond of you already. I massed you so much vesterday and the day before, and looked forward to seeing ou, and now I am quite happy you have come-that is love, I suppose? smiling archly and frankly

"Dearest," returned Marsden with a quick sigh, kissing her hand before he released it. "For God's sake spare me such arguments! You only prove how much you have to learn't However, your promise to be mine is all I ask now: assure me once more that you will be my wife?

Touched by the eager, pained pleading of his eyes. Nora gave him hand again, and said softly, solemn-"I do, indeed, promise to be your wife and to love you. "Sweetest, kindest!" cri

cried Marsden, his face aglow with joy. word more—when? There is no need for useless delays. When, Nora?

"I will not marry before the fif-teenth of next February," she said with decision.

"But, Nora, that is more than two months off.

Very little more than two." "And why not before?

On the lifteenth of February shall be twenty-one, and I want to settle part of what I possess on Helen and Bea. Ind I not tell you

yes, of course; and quite right too; but your marriage need not prevent that? I shall assist you in making this settlement.

Yes; but I would prefer making it while I am my own mistress.

"Your own mistress! Why, you will always be your own mistress! But do not let us quarrel over details, all that will arrange itself. Now, let me put this ring on your finger. It is my signet, and I fancy seems more like taking possession when you wear the crest of my house."
"That is a curious fancy." said

Nora, as she let him slip his onyx seal-ring on her slender finger. best title is my free consent."

"It is free?" he asked. "You don't know how I have longed and schemed for this moment! I never felt so doubtful of success before. I never could make sure of you! Even now, Nora, you do not love as I want to be loved. I feel that keenly. But I have your promise, and you can not hold back your affection from one who hungers and thirsts You are the one for it as I do! supreme good of life to me, and I

have waited patiently."

/'Not very long!" said Nora, who
was touched and moved by the in-"Why, tense feeling in his voice. Clifford, we only met at Lady Dorrington's dance in June! At that time I was a mere child!"

"Nearly six months ago! It is an age! Do you remember the night of that infernal ball of mine when you accused me of taking too much champagne? I knew then that I could not bear to exist without you. and pressed you to my heart in the

ine days or sits. Ruthven's dangerous illness were the worst and most distressful Lady Porrington had ever known. She was really anxious about the sufferer, and she was infinitely annoyed by Marsder's unfeeling indifference. Except for the one burried visit, he was content with a formal daily bulletin; nor did he seem much concerned if, by any accident, that was delayed. It was disgracefully heartless as an abstract fact, and it would have a fatal effect upon Marsden's chances when it came to the knowledge of Mrs. Ruthven.

What was (Inford thinking of? Had he discovered a mine? or had the reports which had reached Lady Dorrington, and been believed by her, as to his extravagance and embarrassment, been exaggerated? He was too trying! What was keeping him in London at such a time? Could there be any truth in the absurd idea that Nora L'Estrange was the attraction? -a mere nobody-slenderly dowered, and nothing remarkable in the way of beauty.

as time went by. Mrs. Ruthven held her ground. There was more tenacity in the fragile-looking, slender little woman than people thought, and at length she was able to sit up for a few hours, to listen were over, she was rat to Lady Dorrington when she read ently in a high fever. the more interesting paragraphs of the newspapers aloud, and finally to

es she felt as if something snapped in her brain. Her heart beat to suffocation, and her imagination presented her with a confused, broken, shadowy mass of pictures from the past.

Was this the result of all Marsden's Was this the result of all implied tenderness and admiration? Had he blinded her keen eyes, and the blinded her keen eyes, a deceived her sharp observation? should pay dear-dear. And that. careless, candid girl, whose easy indifference was absolutely insolent, whose comparative poverty and obscurity ought to have been a barrier to her advancement, was preferred before her wealth and beauty and carefully cultivated grace. was too maddening. If she could destroy both, she would.

And how every one would talk! She had been so sure of becoming Mrs. Clifford Marsden, of Evesleigh Manor-every one knew that the marriage was expected-and now to be deceived, cheated, descrited, for a mere insignificant, half-developed creature! Mrs. Ruthven felt murderous. Her head was dizzy, she passed a terrible night, and next day the doctor was sent for in hot haste, as his patient showed every symptom of a relapse, and before twelve hours were over, she was rambling incoher-

Modernize your Kitchen

One by one the bugbears of housekeeping are being put to rout through the instrumentality of gas. The modern kitchen - which means the all-gas kitchen-is now a recognized part of the up-to-date home. The all-gas kitchen lightens labor. It means a clean, wholesome, sanitary kitchen, as there is no coal dust or ashes to be spread around, and it becomes a real pleasure to work in it. Every housewife desires to cook and heat water in the most economical way, in the quickest, most dependable way, with the least possible work.

The All-Gas way is the solution to the problem.

The hot weather is here now and if you want a cool, comfortable kitchen this summer come and select your Gas Range and Water Heater now. We have ranges at all prices.

THREE GOSSIPS GET WISE.

- "a can't understand it," said Mrs. Bloweash.
- "I never see Mrs. Wise here. Perhaps she don't come to market Le-
- Fresh garden truck now is so dear."
- "I imagine I know," said Mrs. Bigmouth;
 "I guess they're too stingy to come
 I think they're old tightwads, and eggs
- And so they just stay at home."
- "Well, what do they live on?" cried Mrs.
- Perhaps they flourish on air. Though both are so stout and in such
- health-Well, really on what do they fare?"
- Just then came the preacher and joined the trio.
- His smile was half a mile long. He looked so contented that you would have though:
- His life was one grand, sweet song.
- "Good day, reverend sir!" cried Mrs. Blowcash.
- cash.
 "Why, where are the Wise folks, I pray?
 They are never here to buy market things.
 I wonder why they stay away."
- "Oh, my," said the preacher, "they don't need to come!
 They have finer things than you buy.
- They have finer things than you buy. Why, they have a garden and hens that lay eggs
- And sweet corn and berries, oh. my!
- "And Mr. Wise just sent a big rooster down
- For me a fine dinner today, And such a fine lot of lettuce and beans That I'm fairly carried away!
- "And, ladles, I advise that you, too, be wise-
- A garden and hens well repay. Now I must go home—there's rooster to
- eat—
 So now please excuse me. Good day!"
 C. M. BARNITZ.

KURIOS FROM KORRESPONDENTS

Q. How is an egg divided? A. Fiftyseven per cent white, 32 per cent yolk, 11 per cent shell.

- Q What is meant by bloody eggs? A. Eggs in which are streaks and spots of blood. These are generally caused by rupture of small blood vessel in oviduct.
- Q. What is the most frequent cause of soft shelled eggs? A. Overfat.
- Q What is the ovarium, infindibulum, the uterus and the cloaka? A. The yolk cluster. The upper part of oviduct, where yolk is covered with albumen. The middle, where egg is covered with shell. The end of oviduct, where finished egg rests a moment before entering rectum and from thence drops into nest.

FEATHERS AND EGGSHELLS.

picked them and discovered the reason. They were so lousy that all the pickers got lousy, and the little girl had to be stripped she got so full of bugs.

A writer in one of the farm papers declares: "We are the poorest farmers in the civilized world, excepting the Russians only." This is some statement, and the kind colossal fools generally make!

Now comes another discoverer and tells us he has discovered how to tell the sex of eggs and how to control sex in eggs. Let's see. The first fellow who announced such a discovery lived back in the time of Amailas, and the Ananiases and fools aren't all dead yet.

A so called expert "of many years' experience" recently stated in a farm paper "that the death of so many turkeys is caused by their eating so many grasshoppers and other insects on the range. This certainly is new news to turkey raisers, who know better. We den't wish to accuse the editor of the publication with city farming, but really most any city farmer would not let such folderol get into print.

Several institutes where we lectured last winter had apples, potatoes, corn, bread, butter, eggs and live fowls on cylibition and will add a display of dressed poultry next year.

The man that can make good has all the chance now. There was a day when men argued over how many angels can dance on the point of a needle. That day has gone, and the theorist is close on its trail. The impractical positryman, the impractical farmer, the impractical business man, now get it where the rooster gets the ax.

In these days, when high cost of living makes the life of so many a struggle for existence, the main question with the majority is how to get the most out of the soil, our poultry, our work, our hard earned cash. The funcy, the beautiful, the ornamental, is rather lost sight of in the struggle for the necessary. Then is it a wonder when a millionaire spends \$500,000 for a small painting that there is a murmur and many think of rich Dives and Lazarus and the crumbs that fell from the rich man's table?

When the cockbird you are training for show refuses to pose and acts the fool in general just place a coop with a hen in it on top of his coop and watch him straighten and show off his good points. It's the same with human roosters.

A cock pheasant flaps his wings after he crows. A rooster flaps his wings before crowing. Now, if you're going to get off any cockadoodledo wait till you've wou the fight.

Co.M. Barrutz.

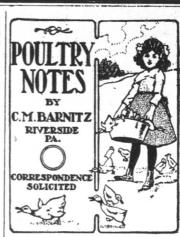

What Any Woman Knew.

"My dear," remarked Jones, who had just finished reading a book on "The Wonders of Nature," "this really is a remarkable work. Nature is marvel ous! Stupendous! When I read a work like this it makes me think how puerile, how insignificant is man."

"Huh!" sniffed his better baif. "A woman doesn't have to wade through 400 pages to find out the same thing" - Judge.

Their Brand of Pride.

To a millionaire who had started life as a poor apprentice a friend said, "Your women folk must be proud of your since you are said made."

[These articles and illustrations must not be reprinted without special permission.]

SPRING'S INSPIRATION.

The air is sweet in springtime— Oh, smell the flowering tree! The blossoms in the orchard Waft perfume down to me. Oh, come and smell the lilacs And gather roses red! Come let us rest in sweet content Beside the lily bed.

The sun is gold in springtime.
The sunbeams shine so bright.
Come from the dreary shadows
Into the golden light.
O sunbeams warm and cheering,
May we be lights like thee
To make the wilderness rejoice
And dreary darkness flee!

The birds are gay in springtime.
They sing of joy and love.
In bowers of lovely flowers
They praise their God above.
So I will join their anthem
And sing a song of praise
To him who made the springtime
And beautifles our days.
C. M. BARNITZ.

HATCHING THE GOSLINGS.

Mother Goose is a peculiar somebody and when she gets ready to hatch it's best to let her have her own way so far as convenient. When laying time comes she will give you the tip by carrying about sticks and straw and soon you will find her nest in some corner lined with feathers from her breast. If a stream is near you will likely find her hatching near the water, for the nesting goose likes to take a

MOTHER GOOSE NESTING.

dip and then return and wet the eggs with her feathers and thus help along incubation. She lays from eight to twenty eggs and if you quietly remove them, leaving one in the nest, she will lay more, sometimes even sixty, but the more eggs she lays the less fertile they are and the less strong the goslings. We prefer to let Mother Goose do the hatching, but if you use hens, Brahmas, Langshans and Cochins are best, six eggs being enough to the hen.

It is wise to set the goose at the same time and let her raise all the gulls, as she does the best with them. Eggs under hens should be dipped in tepid water every other day and goslings hatched under hens should be transferred at night or otherwise Mother Goose will detect the hen odor on them and reject or kill them. Feed, grit and drink should be kept near the nest and the broody goose should not be disturbed, as she will become excited and angry and break her eggs, and the gander, who always stands guard, will give you a thrashing with his strong beak and wing for but-

DON'TS.

Don't let the head lice suck the blood out of your chicks.

Don't forget that early to hatch and early to grow build the big birds that win at the show.

Don't expect to get enough practical knowledge from a poultry library to run your plant. Experience is your best teacher.

Don't let the hens stuff in the corncrib. That means overfat and few

Don't let them into the barn entry. They will steal the feed the horses

Don't let them roost on the manger. Red mites may breed there and may cause a runaway.

Don't think your the only duck in the puddle. There are other quacks.

Don't be caught by a craze. If you jump at a bubble you get nit for your trouble.

Don't expect the hens to keep you if you are too stingy to keep them

Don't let army worms flourish when Pekin ducks will fatten on them and urnish you fine roasts.

Don't think the fellow at the other end of the deal is a dummy. He may be a preacher of wide poultry experi-

Don't determine to do better tomorrow. Do it now.

Narrow Escape.

"Don't you regret your youin?"
"Sometimes," replied Mr. Growcher.

"And then again I'm kind o' glad to get away from the period of my existence when my supreme ambition was to be a good banjo player."-Washington

A Washington Farmers Good Roads Endorsement

MR. FRANK TERRACE, ADDRESSING THE Good Roads Convention at Tacoma, Washington, gave the following enthusiastic testimony in favor of good roads:

"I am a cabbage grower. I haul my produce to the sauerkraut factory at South Seattle. Before the road over which I travel was built, I had to get up at 4 o'clock in the morning to start on my journey. The limit of the load I could haul with a team of 1800 pound horses was 2500 pounds, and after visiting the factory I would arrive back at my home late in the evening. But look at the difference now that a permanent hard surface has been laid down. I start on my trip about 8 o'clock and need only a team weighing 1400 pounds to haul a load of 5000 pounds of cabbage, which is double my previous capacity. best of all, I find on my return to the house early in the afternoon, that I have finished the day's work without the horses having turned a hair.'

Concrete Roads Mean Road Economy

They prevent your road taxes being spent in patching up roads that never will be good roads.

They are the cheapest kind of roads at the end of ten, fifteen or twenty years because they practically eliminate the cost of upkeep. They enable you to haul bigger loads with less effort and less wear and tear on horses and vehicles. They increase land values, better conditions generally, and decrease the cost of living.

Write for, free, Good Roads literature, and learn how good roads will benefit you.

'arious other sheer cottons have ne into popularity. Swiss and oridie are, of course, old favorites, but ir crispness, once their chief merit, made them yield place somewhat the softer mulis and batistes and ens, though they are still liked. The ton nets, voties and crapes are more ent arrivals and have achieved deed popularity.

'hese launder well, are easily hand and are very soft, graceful and able despite their sheerness, and y lend themselves admirably to simforms of trimming, although they may be made very elaborate with hand embroidery.

The cotton nets come in varying meshes, in wide widths and are not extremely expensive. Frequently one sees a frock made entirely of the net and quite devoid of trimming save for scalloped or picot edges or edges hemstitched.

The fashions of the moment are of a character that make it difficult to select for elderly women costumes that will be both fashionable and dignified. For the woman whose figure is more than a little plump the gown illustrated here is both becoming and smart. This tub frock is carried out in white cotton crape trimmed with venise lace. The long front line, the gore over the hips and the long points in the blouse give a cleverly contrived effect of slenderness. The gown fastens invisibly down the front by means of closely set snappers, A touch of black is given to the blouse by means of the black velvet ribbon girdle and the band of black velvet ribbon across the vestee. Crocket ornaments and crochet buttons decorate the garment.

TOWELING APRONS.

They Are Useful In Many Household Emergencies.

The newest idea for an apron is one made of toweling. The kind that can be purchased by the yard, with stripes or wide stripes at each side, is used. The blue barred toweling also can be turned into attractive aprons.

These toweling aprons are usually made with a bib and can be used for sewing, housework or chafing dish aprons. Of course they have one or two large pockets, a necessary adjunct to all serviceable aprons.

The edge is sometimes fringed, which makes a very good finish, or it is simply hemmed, using the French method. which makes the stitches invisible.

The use of Turkish toweling made into aprons has been discovered by young mothers, as it is just the thing to wear when giving baby his bath.

PASTURE FOR SHEEP.

Succulent Grazing and Shade Needed During the Summer.

Summer pasture is a very important consideration in raising sheep. animals should have grazing so that they can find succulent food in the morning when the temperature is cool and again in the afternoon when the rays of the sun are not so penetrating. After the temperature gets high in the middle of the day the sheep will need shade and water so they may keep rool.

A woods pasture where there is Bermuda or other handy grass, where there are trees to furnish shade for the animals, is a good place for sheep when the weather is warm. A few acres of land that would otherwise be worthless may be used as a pasture for sheep.

But it is not economical to depend upon a woods pasture where the grazing is rather short, as the animals will need plenty of feed if they are to be profitable. They should have crops planted for grazing to supplement the woods pasture, and some grain and hay should be given daily. The lambs

should be well cared for and the ewes and rams given an opportunity to make gains even in very trying weather.-Farm and Ranch.

GROWING DRAFTERS.

Haphazard Methods of Breeding and Feeding' Produce Failure.

Horsemen generally take a keen interest in facts relative to the production of the exceptional individual. With horses containing draft blood no particular interest is manifested in the half decent chunk, says Professor S. C. Edmonds of the Illinois Agricultural college. He can be produced by a good many different methods and quite frequently is the result of the absence of proper effort. With the No. 1 draft gelding it is different. No helter skelter methods of breeding, feeding and care will produce him.

Sires and dams of indifferent merit will not do the work. Whatever the breed, nothing short of a sire that clearly shows he would have made a valuable horse in the collar had he been given the opportunity will make good.

Many breeders of pure bred animals would profit by closer touch with the gelding market. Such contact would

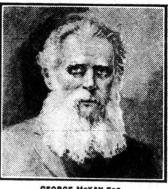

Poor horses are a detriment to the farmer. Plowing with light horses is more expensive than with heavy animals. Big drafters are more efficient for all work, while their upkeep, in proportion to the work they do, is much less. Also the profit from raising colts from pure bred draft sires is sure and steady. The dermand is nearly all. steady. The demand is nearly always greater than the supply. A good draft colt is ready money on the market at profitable prices. The picture shows a Percheron grade of excellent form.

help the useful, rugged sort which are occasionally sacrificed for the "pretty" ones. Refinement is necessary, but it should not serve as an excuse for sacrificing that rugged stamina absolutely essential in the makeup of the successful draft horse. No mistake will be made by staying by the type which has shown ability to handle efficiently big loads on hard footing.

No animal will pay bigger dividends on liberality with the feed pail than the well bred draft colt. As yet no one has discovered a secret process whereby stunted yearlings may be made over into big, thrifty horses even by extra care in succeeding years. "Doing" stuff well does not mean pampering. In fact, heavy feeding and lack of exercise will defeat the end as disastrously as will the opposite course. It takes careful all around attention to produce the exceptionally good individual.

A FAMILY REMEDY FOR MANY YEARS

Used "Fruit-a-tives" With The Best of Results.

GEORGE MCKAY Esq.

KIPPEN, ONT., June 17th. 1913. "I have been using "Fruit-a-tives" as a family remedy for many years. They are the best medicine I have ever tried. "Fruit-a-tives" do me the most good—they never gripe and their action in pleasure. action is pleasant.

'I have used them for Indigestion and Constipation with the best results, and I heartily recommend them to

anyone similarly afflicted.

These troubles have left me completely and I give "Fruit-a-tives" full credit for all this. A nicer pill a man cannot take."

GEORGE MCKAY.

The enormous demand for "Fruit-atives" is steadily increasing, due to the fact that this wonderful fruit medicine gives prompt relief in all cases of Indigestion, Constipation, Sour Stomach, Rheumatism, Chronic, Headaches, and Neuralgia, and all Kidney and Bladder Troubles.

50c a box, 6 for \$2.50, trial size 25c.

Sold by all dealers or sent on receipt of price by Fruit-a-tives Limited, Ottawa.

A Great Invention.

Mr. Edison is apt to be rather crusty with visitors to his workrooms when they ask too many questions.

One day a rather talkative journalist pointed at a model. "What's that?" he asked.

Mr. Edison, who was getting very weary of the man's endless questions, replied blandly: "That, my dear sir, is a cradle that rocks by sound. You put the baby in and the louder it howls the faster the cradle rocks!"-Pearson's Weekly.

Painfully Particular.

"If you refuse me this time," he said, "I shall never ask you to be my wife

"Oh, please," replied the girl from Boston, "try to use better English. 1 never have been your wife. Why should you ask me to be your wife again?"-

A novel attraction at the Lennox Fall Fair will be a tug-of-war on horse-back—the horses to have nothing on but bridle and the riders to go-as-you-please. This event will take place on the track at 3.30 p.m. Be sure you see

A large number of citizens accompanied by the Napanee Band and a detachment of the signal corps went detachment of the signal corps went to the G. T. R. station on Thursday afternoon to see the Cobourg Artillery train pass turough. The train stopped at Napanee for a few minutes while the band played a few patriotic airs, and the large crowd heartily cheered the soldiers. Major J. Odell, of the Cobourg Artillery, through the press sends his hearty thanks to the people of Napanee, for the send-off at the station, coupled with the statement that the artillery under his command, will heartily do their duty.

Fire broke out in the business section of Bancroft, on Saturday evening Suly 5th, completely gutting the post office, and many prominent houses of business. The fire, which started in the bake-house, damaged property to the value of \$100,000. Largely by the efforts of the young men, led by the Presbyterian student here, the fire was prevented from spreading to the other parts, and so destroying the town. These young men deserve great praise for their noble and untiring way in which they laboured say. ing way, in which they laboured, saving property comforting people, and even distributing tea and lemonade to even distributing tea and smoke be to insure its kee the famished women, and smoke be to insure its kee Store, Limited.

D. W. Young, Sec.-Treas.

Albert College's Good Record.

The results of the recent examinations, so far reported, are most grati-One hundred of those tried the musical examinations, passed, many with honors, and some with first-class honors. Of those recommended to write on the Lower School all were successful. Over eighty per cent. of those who wrote on Senior Matriculation got their standing. Good for Albert! The Express extends congratulations!

The Best Cow.

Mr. Arch. Parks, breeder of Holstein Cattle, will exhibit his herd at the Napanee Fall Fair. Everyone interested in dairying should see his cow, Daisy Pauline Peterjie, which is probably the best cow in Canada to-day. Her record for the past year is 23807 lbs. of milk and 1037 pounds of butter. This cow gives as much milk as some whole herds. In Mr. Park's herd are some other Holsteins with very large milk records. See them at the Fair!

FISHING TACKLE

New trolling spoons, and new lines and hooks. BOYLE & SON.

Fortieth Anniversary.

On July 24th, the home of Mr. and Mrs. Isaac Fitchett, Hay Bay, was the scene of a very pretty picnic, it being the fortieth anniversary of their wedding. The day was beautiful, and everyone present enjoyed themselves. Tables were spread on the lawn for both dinner and tea and looked very pretty indeed decorated with sweet peas and red and white carnations, centred with the wedding and bride's cake along with many other goodies, to which after the usual congratula-tions and God's blessings were asked, all did ample justice. There were nine happy little grandchildren in the group, which grandma and grandpa took great delight in entertaining as well as they did the older ones. Also before evening, which came on only too soon, the bride and groom were asked to accept from their seven children two nicely filled envelopes to choose what they wished as a remembrance of the pleasant day spent after which all returned home, leaving with them their best wishes of many more years of happy wedded life.

Scarcity of Fruit.

The scarcity and high price of fruit should lead people to take no chance but to use Wallace's preserving powder to insure its keeping. Wallace's Drug

RESOLUTION OF CONDOLENCE.

Tamworth, Ont., Aug. 3rd, 1914.

Tamworth Lodge, 1.O.O.F., No. 392. Dear Brothers :-

It is with deepest sorrow and regretthat we have been compelled to witness your sad bereavement and loss in the death of your only and beloved sister, under such distressing circum-stances, and though conscious of the fact that any words of condolence can bring the merest trifle of consolation; yet as brothers of an Order, whose chief aim is to relieve the burdened, sympathize with the distressed, and mutually help each other in time of need, we personally and unitedly, as a Lodge, hereby desire to express to you our feelings of deepest sympathy, and pray that in this your hour of trial and sorrow, you may have strength and grace sufficient for your day and that the darkness of the pre-sent cloud may make life's sunshine more enjoyable in the days to come.

On Behalf of Tamworth Lodge,
